TEN GOLDEN RULES FOR ROAD SAFETY

1. **STOP OR SLOW DOWN** : Allow pedestrians to cross first at uncontrolled zebra crossings.
2. **BUCKLE UP** : So that your family and you are safe in the car. Seat Belts reduce the chances of death of a car occupant in accidents .
3. **OBEY TRAFFIC RULES AND SIGNS** : To prevent road accidents.
4. **OBEY SPEED LIMITS** : For your own safety and that of others. In residential areas and market places, ideal speed should be 20 kmph and the maximum speed limit is 30 kmph.
5. **KEEP VEHICLE FIT** : To prevent breakdown and accidents on road.
6. **NEVER USE MOBILE WHILE DRIVING** : To avoid distractions that largely lead to accidents.
7. **WEAR HELMET** : To protect your head while riding a two wheeler. A good quality helmet reduces the chances of severe head injury.
8. **NEVER DRIVE DANGEROUSLY** : To ensure your own safety and that of other road users.
9. **BE COURTEOUS** : Share the road with all and be considerate. Never rage on the road.
10. **NEVER MIX DRINKING AND DRIVING** : Be Responsible... Don't drink while driving.

FOREWORD

Over the years, the significant growth of vehicles on road has been the leading cause of accidents resulting into deaths, disabilities and hospitalizations with severe socio-economic costs across the country.

During the year 2014, there were around 4.89 lakhs road accidents which killed about 1.40 lakh people and injured more than 4.93 lakh persons in India. The analysis of road accident data 2014 reveals that about 56 accidents take place and 16 lives are lost every hour on an average in our country. In India, 53.8 per cent road accident victims are in the age group of 15 to 34 years. Further, drivers' fault (78.8 per cent) has been found as the single most important factor responsible for road accidents.

Road accidents are human tragedy which involves high human sufferings. The loss of main bread earner and head of households due to death or disability can be catastrophic, leading to lower living standards and poverty in addition to the human cost of bereavement of the highest degree. Thus, road safety has become an issue of national as well as international concern.

Road traffic accidents are amenable to remedial action. Significant reduction in accident rate is a big challenge for us. It is only possible by a wide variety of improvements in design of vehicles in tune with the Indian weather conditions, by strengthening infrastructure particularly rural connectivity, structural improvements in National Highways and State Highways and enforcement of safety regulations and standards. In this context, we have undertaken many initiatives and are implementing various road safety improvement programmes along with strong monitoring mechanism.

The purpose of this publication is to present an in-depth analysis and an over-view of the accidents in India and bring into focus the challenges relating to the prevention of road accidents and their impact. The data and subsequent analysis on road accidents contained in this issue would help to create awareness and to understand the complex issues involved in the decision making process related to road safety. Nevertheless, this analysis will facilitate in formulating a multi-pronged strategy to prevent loss of human resources on account of road accidents, fatalities and injuries. I believe that this document would be useful for policy makers, scholars, civil society organizations and society at large.

PREFACE

It is a well-known fact that the co-ordinated system of transport plays an important role in the sustained economic growth of a country. The present transport system of India comprises several modes of transport including rail, road, coastal shipping and air transport etc. Transportation in India has recorded a substantial growth over the years both in spread of network and in output of the system. The Ministry of Road Transport and Highways is responsible for the formulation and implementation of policies and programmes for the development of various modes of road transport.

In the above context, it is noteworthy to mention that Transport Research Wing of the Ministry of Road Transport and Highways brings out every year a publication on "Road Accidents in India". The present issue 'Road Accidents in India-2014' provides information on various facets of road accidents in the country during the calendar year 2014 which includes recent and long-term trends; normalized indicators of road accidents; injuries and fatalities; the details of major 13 States in terms of road accidents; severity of road accidents; injuries and deaths in Millions Plus Cities; accidents in terms of classification of roads; spatial distribution of road accidents (Urban vis-à-vis Rural); accidents classified in terms of involvement by vehicle type; time of occurrence of road accidents; age profile of road accident victims; nature and causes of road accidents; international comparisons; road safety initiatives by the Government of India etc.

Information contained in this publication is gathered from the Police Headquarters of the various States, UTs and Million Plus Cities in India through specific designated nodal officers DGP/ADGP (Crime), ADGP (Traffic), Director (State Crime Record Bureau) in a 19 items format devised under Asia Pacific Road Accident Data (APRAD), Indian Road Accident Data (IRAD), project of the United Nations Economic and Social Commission for Asia and Pacific (UNESCAP). An effort has been made by Transport Research Wing to capture all the information provided by the States/UTs as per the prescribed format.

I am especially thankful to the police (traffic) personnel of all the States/UTs, for furnishing the requisite data/information as per the prescribed format to Transport Research Wing in time. I sincerely appreciate the genuine efforts, cooperation, valuable contribution and everlasting support provided by all in completing this issue. This publication is a joint endeavor of each official of Transport Research Wing by contributing their professional competence, knowledge and understanding of the subject and their deep commitment towards the cause. I hope that this issue on 'Road Accidents in India-2014' will be of immense use for the fraternity of policy makers, academia, civil society organizations and society at large.

Executive Summary

1. India is experiencing one of the highest motorization growth rate in the world accompanied by rapid expansion in road network and urbanization over the years. Generally speaking, this phenomenon has significantly contributed in raising the road accident rate resulting into injuries, fatalities, disabilities and hospitalization. All of these, in turn cause severe socio-economic costs to the country. Traffic hazards, exposures and risk factors have also increased over the years.
2. The United Nations has rightly proclaimed 2011-20 as the Decade of Action on Road Safety. A number of road safety initiatives have been taken by the Government of India, State Governments and other stake-holders during the calendar year 2014.
3. The total number of road accidents increased marginally from 4,86,476 in 2013 to 4,89,400 in 2014. The total number of persons killed also increased by about 1.5 per cent from 1,37,572 in 2013 to 1,39,671 in 2014. However road accident injuries have marginally reduced from 4,94,893 in 2013 to 4,93,474 in 2014. An analysis of road accident data of 2014 revealed that on an average about 56 accidents take place and 16 lives are lost every hour in India.
4. A very high percentage of road accident victims are in the age group of 15 to 35 years. This group of people account for 53.8 per cent of all persons killed in road accidents during 2014.
5. During 2014, thirteen top States namely Tamil Nadu (67,250), Maharashtra (61,627), Madhya Pradesh (53,472), Karnataka (43,713), Kerala (36,282), Uttar Pradesh (31,034), Rajasthan (24,628), Andhra Pradesh (24,440), Gujarat (23,712), Telengana (20,078), Chattisgarh (13,821), West Bengal (12,875) and Haryana (10,676) together accounted for 86.3 per cent of all road accidents in the country. Tamil Nadu has reported the highest number of road accidents while Lakshadweep reported lowest i.e only one road accident.
6. Around 83.3 per cent of all road accidents fatalities occurred in the top thirteen states during 2014. These States are Uttar Pradesh (16,287), Tamil Nadu (15,190), Maharashtra (12,803), Karnataka (10,452), Rajasthan (10,289), Madhya Pradesh (8,569), Gujarat (7,955), Andhra Pradesh (7,908), Telangana (6,906), West Bengal (5,875), Bihar (4913), Punjab (4621) and Haryana (4483), whereas 23,420 accidental deaths had taken place in other States/UTs. In terms of absolute numbers, highest number of deaths had taken place in Uttar Pradesh, leaving out Lakshadweep where there was no road accident fatality.
7. During 2014, a total number of 4,93,474 persons were injured in road accidents, in our country. Out of these 87.5 per cent were accounted for by the top thirteen states. These states are Tamil Nadu (77,725), Karnataka (56,831), Madhya Pradesh (55,335), Kerala (41,096), Maharashtra (40,455), Andhra Pradesh (29,931), Rajasthan (27,453), Gujarat (22,493), Uttar Pradesh (22,337), Telangana (21,636), Chhattisgarh (13,157), West Bengal (12,018) and Odisha (11,087). Tamil Nadu reported the highest number of persons injured in road accidents, Lakshadweep reported only one accident injury.
8. In 2014, fifty Million Plus Cities accounted for a share of 22.7 per cent in total road accidents in the country, 11.9 per cent in total persons killed in road accidents and 16.8 per cent

in total persons injured in road accidents. Mumbai had the highest number of road accidents (22,570) while Delhi had the highest number of deaths (1671) due to road accidents.

9. As reported by States/UTs, during 2014, Drivers' fault (78.8 per cent) has been found as the single most important factor responsible for road accidents as against 78.0 per cent during 2013. Within the category of drivers' fault, accidents caused and persons killed due to "Exceeding lawful speed" by drivers accounted for 55.0 per cent(2,08,271 out of 3,78,992 accidents) and 56.2 percent(57,844 out of 1,02,878 deaths) respectively. Accidents and deaths caused due to "Intake of alcohol/drugs" accounted for 5.0 per cent (18,916 out of 3,78,992 accidents) and 6.8 per cent (6,968 out of 1,02,878 deaths) respectively.

10. During the calendar year 2014, the total number of hit and run cases was reported as 53,334 which was higher by 7.6 per cent as compared with 49,576 accidents reported in the year 2013. The number of persons killed due to hit and run cases were reported as 19,569 which was higher by 4.6 per cent in 2014 as compared to the preceding year (18,702).

11. During the year 2014, overloaded vehicles caused 91,335 accidents and 26,809 road accidental deaths. It constituted a share of 18.7 per cent and 19.2 per cent respectively in total road accidents and fatalities in the country.

12. Two modes of road transport which accounted for the higher shares in total road accidents were Two Wheelers (27.3 per cent) and Cars, Jeeps &Taxis (22.7 per cent) as reported by the States/UTs during 2014.

13. Out of total road accidents, 28.2 per cent, 25.2 per cent and 46.6 per cent of road accidents took place on National Highways, State Highways and Other Roads respectively in the country during 2014.

14. During 2014, the time-slot with high rate of road accidents was 15:00 to 18:00 hours and 18:00 to 21:00 hours, accounting for a share of 17.3 per cent (84,436) and 17.0 per cent (83,254) respectively in the total road accidents during 2014. During the same slot in 2013, the rate of accidents was 17.1per cent (83,258) and 16.9 per cent (82,149) respectively.

15. The highest number of road accidents occurred in the month of May (45,404) followed by March (42,524), thus contributing 9.2 per cent and 8.6 per cent of total accidents month wise respectively throughout the calendar year, 2014.

16. Rural areas are more prone to road accidents, accounting for 53.7 per cent of total road accidents during 2014. The percentage of road accident fatalities (59.4 per cent) and injuries (58.0 per cent) were also more in rural areas as compared to the urban areas in the country.

17. Generally speaking, traffic junctions are accident prone areas. About 57 per cent of total accidents took place on the junctions itself as per 2014 road accident data reported by States/UTs as against 59.4 percent during 2013.

Section I: Accidents on Indian Roads - 2014

1. Introduction

Rapid expansion in road network, motorization and urbanization in the country has been accompanied by a rise in road traffic accidents resulting into injuries, fatalities, disabilities and hospitalization with severe socio-economic costs across the country. Road safety has become an issue of concern at national as well at the international level. The United Nations has rightly proclaimed 2011-20 as the Decade of Action on Road Safety.

2. Recent Trends

The total number of road accidents increased marginally from 4,86,476 in 2013 to 4,89,400 in 2014. During the calendar year 2014 the total number of persons killed also increased by about 1.5 per cent from 1,37,572 in 2013 to 1,39,671 in 2014. However, road accident injuries have marginally reduced from 4,94,893 in 2013 to 4,93,474 in 2014. The accident severity increased slightly during 2014 as compared to the preceding year i.e. 2013. A comparative scenario of 2013 and 2014 is depicted in Table 1.1.

Table 1.1 : Road Accident Parameters: 2013 and 2014			
Parameter	2013	2014	% change over previous year
Accidents	4,86,476	4,89,400	0.6
Person Killed	1,37,572	1,39,671	1.5
Person Injured	4,94,893	4,93,474	-0.3
Accident Severity*	28.3	28.5	0.7

* No. of persons killed per 100 accidents

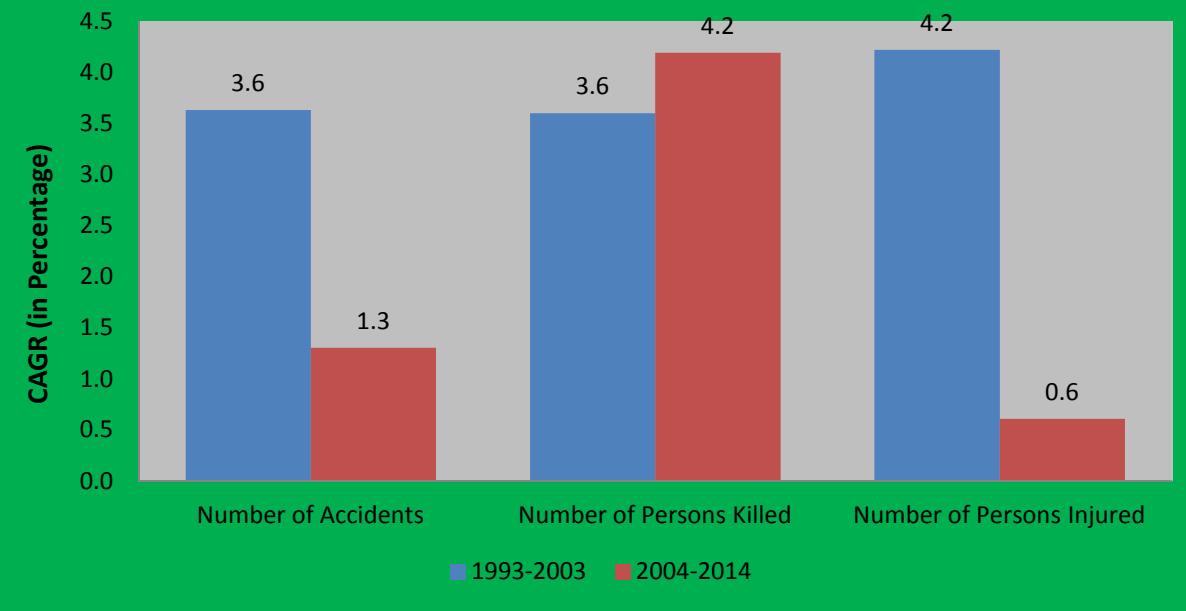

Though, there was an increase in the absolute number of road accidents in the country during 2014 as compared to 2013, there was a marginal reduction in the number of road accidents per lakh population from 39.8 per cent in 2013 to 39.5 per cent in 2014.

The total number of persons injured in road accidents declined both in absolute and relative term. The number of persons injured in road accidents per lakh of population also declined from 40.4 per cent in 2013 to 39.8 per cent in 2014.

3. Long-term Trends

The Compound Annual Growth Rate (CAGR) of number of road accidents in the country during the decades 1993 -2003 and 2004-2014 has decreased from 3.6 per cent to 1.3 per cent. However, in the case of number of road accident fatalities, the CAGR has increased from 3.6 per cent to 4.2 per cent and in case of number of persons injured has declined from 4.2 per cent to 0.6 per cent during the same period. This is depicted in Chart 1.1 .

Chart 1.1: Compound Annual Growth Rate 1993-2003 and 2004-2014

4. Profile of Road Accidents

During 2014, a total of 4,89,400 road accidents were reported by all States/Union Territories. Of these 25.7 per cent (1,25,828) were fatal accidents. The number of persons killed in road accidents were 1,39,671 i.e. an average of one fatality per 3.5 accidents. The number of road accidents, road accident fatalities and persons injured in road accidents in India during 2003 to 2014 is shown in Chart 1.2. A detailed State/UT wise analysis of accidents, persons killed and injured for the years 2011 to 2014 along-with different indicators such as (a) per lakh persons, (b) per ten thousand motor vehicles and (c) per ten thousand kilometers of road length is given at Annexure III, IV and V respectively.

Chart 1.2: Total number of Road Accidents, Persons Killed & Persons Injured during 2003-2014

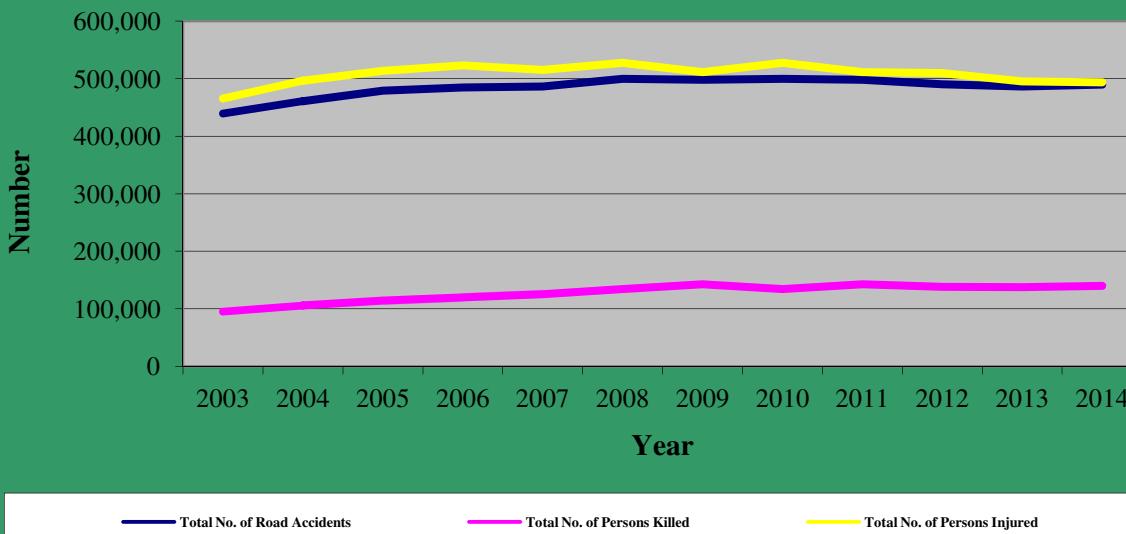

Table 1.2: Number of Road Accidents and Number of Persons affected: 2003-2014

Year	Number of Accidents		Number of Persons		Accident Severity*
	Total	Fatal	Killed	Injured	
2003	4,06,726	73,589 (18.1)	85,998	435,122	21.1
2004	4,29,910	79,357 (18.5)	92,618	464,521	21.5
2005	4,39,255	83,491 (19.0)	94,968	465,282	21.6
2006	4,60,920	93,917 (20.4)	105,749	496,481	22.9
2007	4,79,216	1,01,161 (21.1)	114,444	513,340	23.9
2008	4,84,704	1,06,591 (22.0)	119,860	523,193	24.7
2009	4,86,384	1,10,993 (22.8)	125,660	515,458	25.8
2010	4,99,628	1,19,558 (23.9)	134,513	527,512	26.9
2011	4,97,686	1,21,618 (24.4)	1,42,485	5,11,394	28.6
2012	4,90,383	1,23,093 (25.1)	1,38,258	5,09,667	28.2
2013	4,86,476	1,22,589(25.2)	1,37,572	4,94,893	28.3
2014	4,89,400	1,25,828(25.7)	1,39,671	4,93,474	28.5

Source: Information supplied by States/UTs (Police Departments).

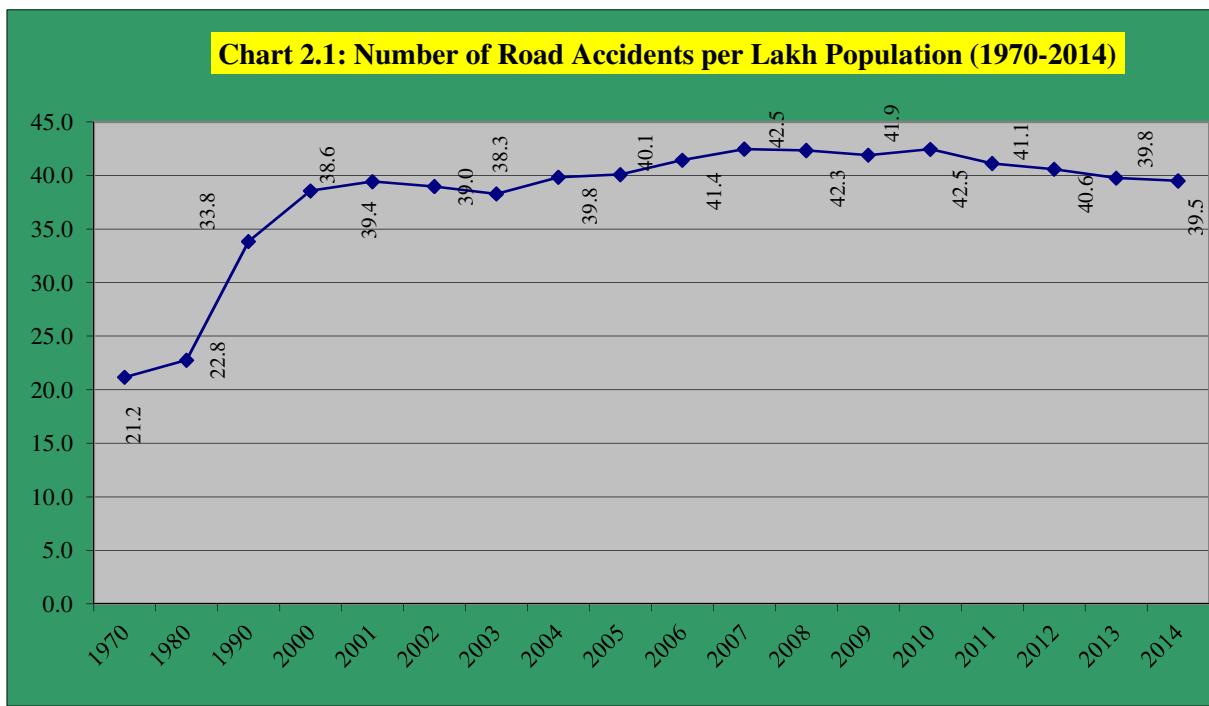

Figures within parentheses indicate share of fatal accidents to total accidents.

* Accident Severity : Number of persons killed per 100 accidents

Section II: Normalized Indicators of Road Accidents, Injuries & Fatalities: All India Averages

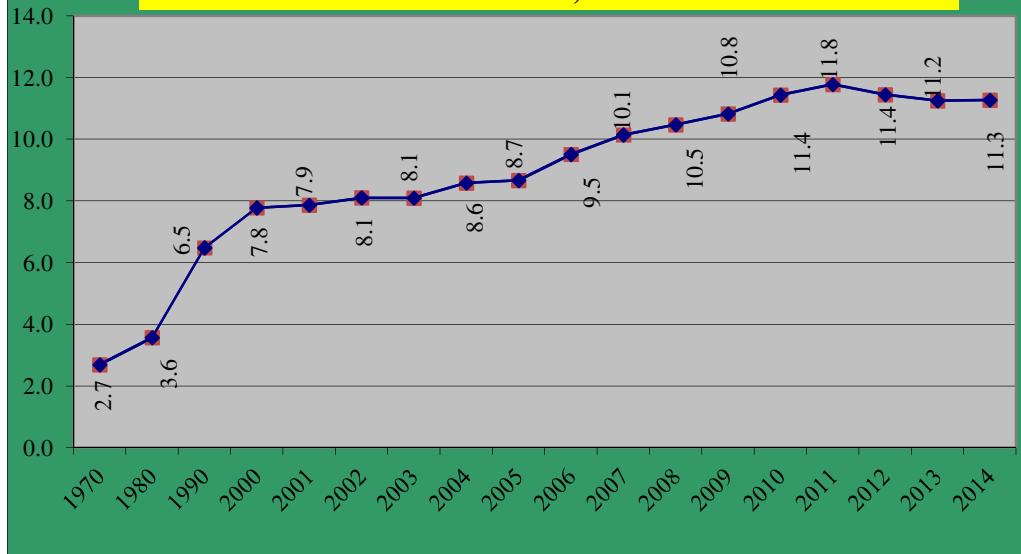

To get an appropriate measure of incidence of accidents, the normalized/standardized accident rates of India have been worked out in terms of number of accidents on the basis of (a) per lakh persons, (b) per ten thousand motor vehicles and (c) per ten thousand kilometers of road length for the years from 1970 to 2014. A detailed analysis is provided in Annexure –I. Some of the broad trends at all-India level are summarized below.

- a. Chart 2.1 Indicates the number of accidents per lakh population from 1970 to 2014.

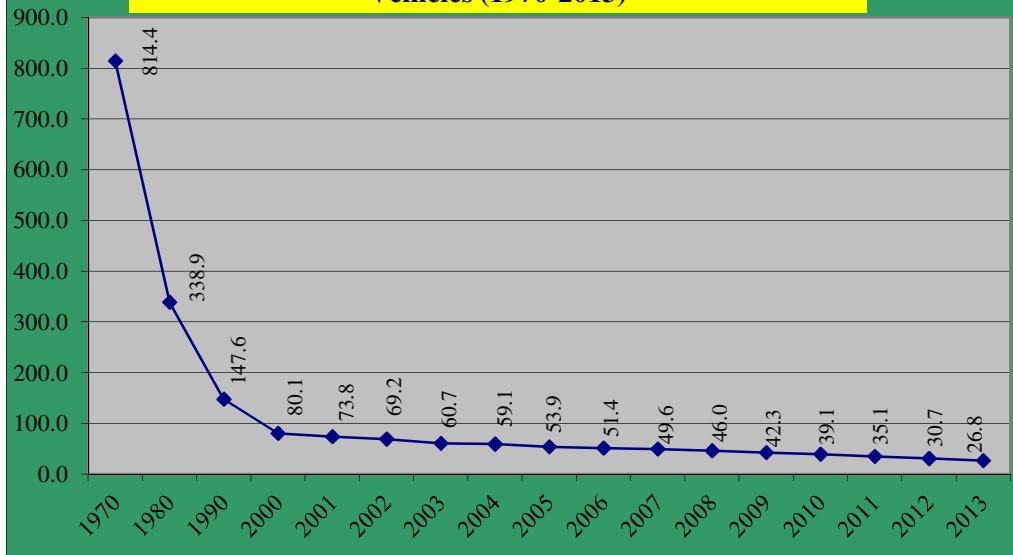

- b. Persons killed per lakh of population have shown an alarming increase from 2.7 per cent in 1970 to 11.8 per cent in 2011. Thereafter, it declined to 11.2 per cent in 2013 and again slightly rose to 11.3 per cent in 2014 as shown in Chart 2.2.

Chart 2.2: Number of Persons Killed per lakh Population (1970-2014)

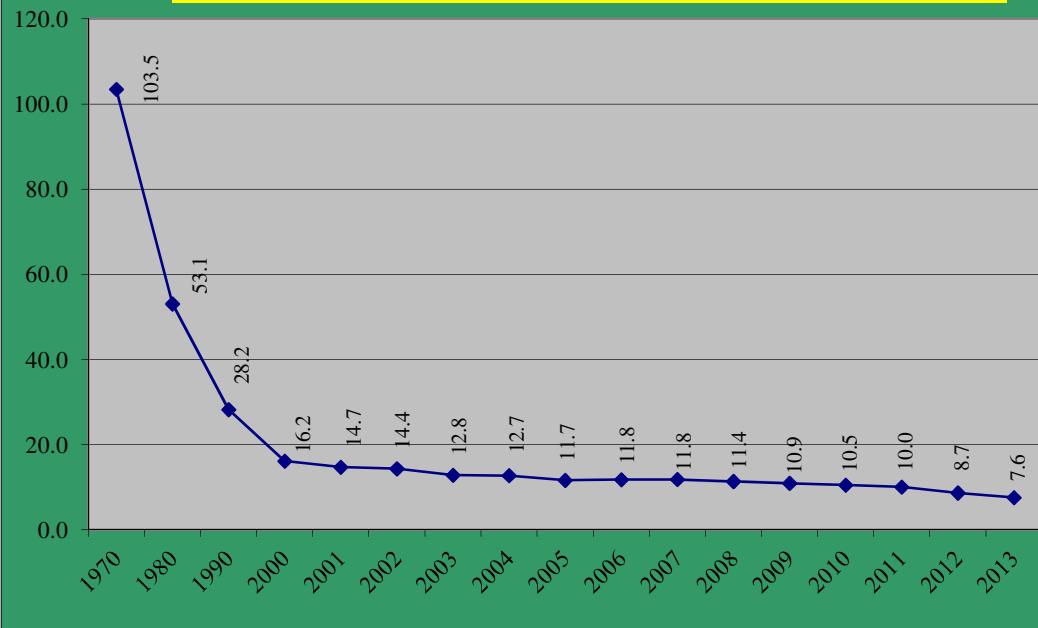

- c. A significant decline in the number of accidents per ten thousand motor vehicles is discernible from 814.4 per cent in 1970 to 26.8 per cent in 2013 shown in Chart 2.3.

Chart 2.3 : Number of Road Accidents per Ten Thousand Vehicles (1970-2013)

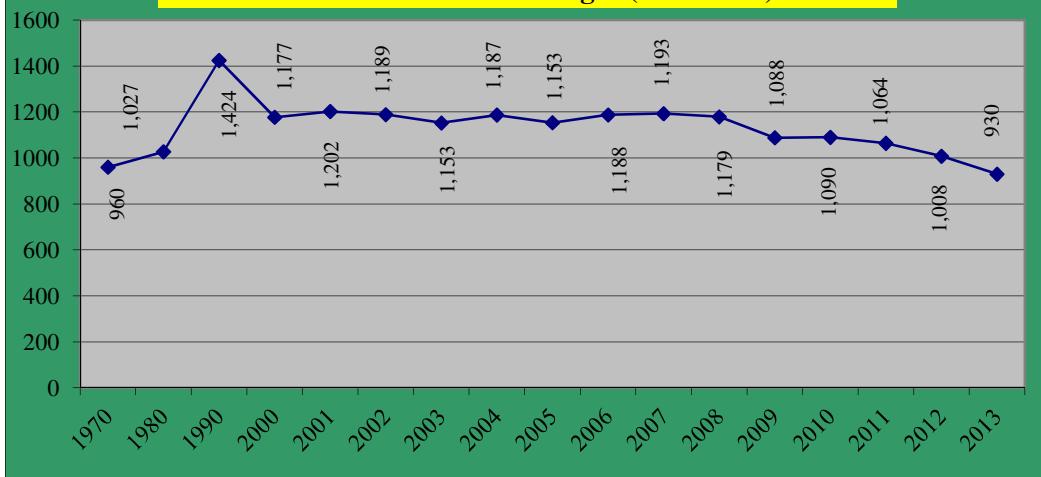

- d. As regards number of persons killed per 10,000 vehicles, the decline has been significant. The number of persons killed per 10,000 vehicles in the country has also fallen from about 103.5 per cent in 1970 to 7.6 per cent in 2013 as shown in Chart 2.4. However, deaths per 10,000 motor vehicles as a parameter has a limitation as it does not capture road related accidents and deaths connected with non-motorized forms of transport which are significant in rural areas.

**Chart 2.4 : Number of Persons Killed per Ten Thousand Vehicles
(1970-2013)**

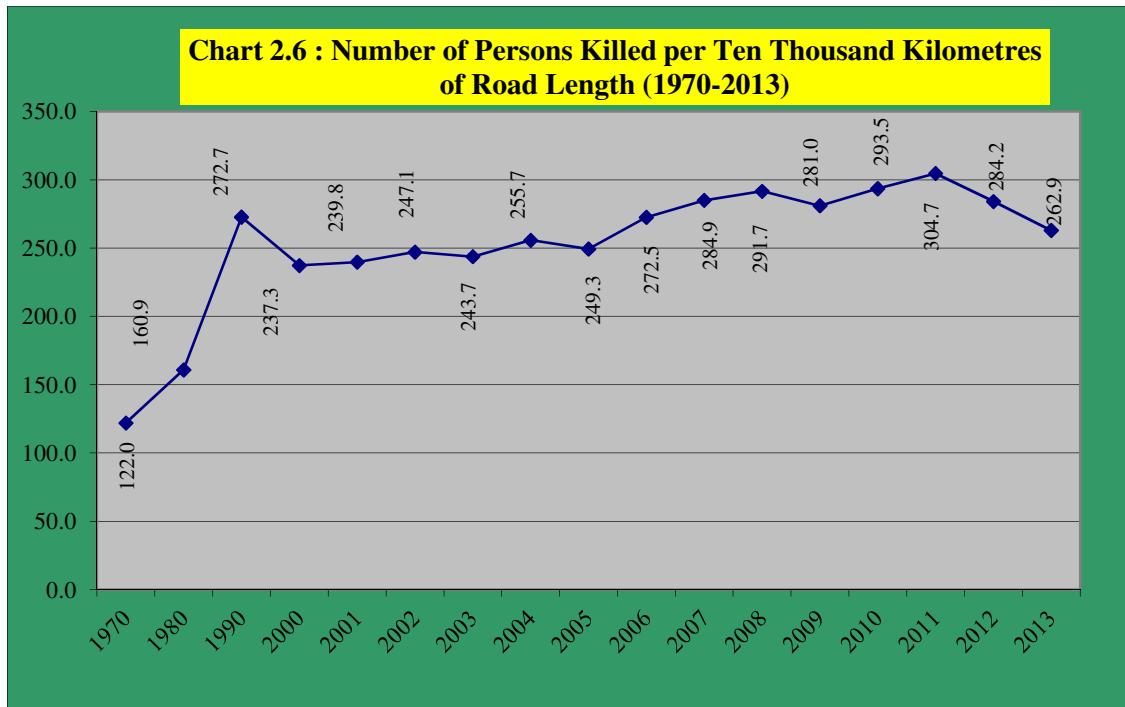

- e. The trend in the number of accidents per ten thousand kilometers of the road length shows continuous decline from 1,064 in 2011 to 930 in 2013 as shown in Chart 2.5.

Chart 2.5 : Number of Road Accidents per Ten Thousand Kilometres of Road Length (1970-2013)

f. Lack of foot-paths, service lanes, cycle tracks, where non-motorized mode of transport blend with motorized traffic, increases the risk of accidents and its severity. These factors have contributed towards increase in road related accidents, injuries and deaths in proportion to rise in terms of road length. Chart 2.6 indicates the number of persons killed per ten thousand kilometres of road length from 1970 to 2013.

Section III: Month-Wise Classification of Accidents

The month wise details of road accidents, persons killed and injured in respect of all states/UTs during 2014 are given below at table 3.1:

Table 3.1: Month-Wise classification of accidents

	JAN	FEB	MAR	APR	MAY	JUNE	JULY	AUG	SEP	OCT	NOV	DEC	Total
Accidents	41,954	39,899	42,524	39,867	45,404	42,448	38,916	39,213	37,360	39,791	40,040	41,984	4,89,400
Killed	11,455	11,329	12,130	11,655	13,940	12,559	10,922	10,797	10,230	11,176	11,423	12,055	1,39,671
Injured	42,363	40,953	43,113	41,363	46,801	42,800	38,577	39,894	37,631	39,730	38,760	41,489	4,93,474

Chart 3.1 : Month - Wise Total Number of Accidents (2014)

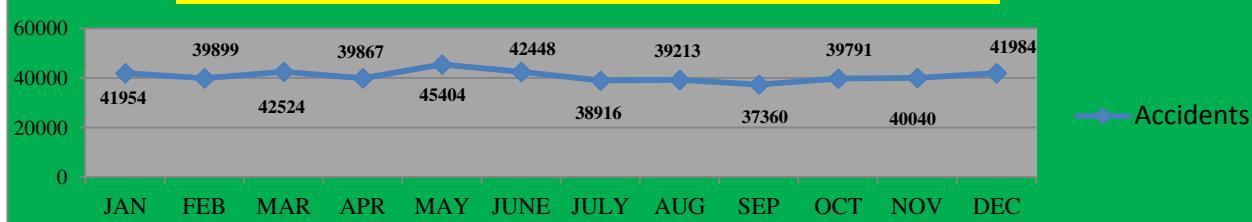

Chart 3.2: Month - Wise Total Number of Persons Killed (2014)

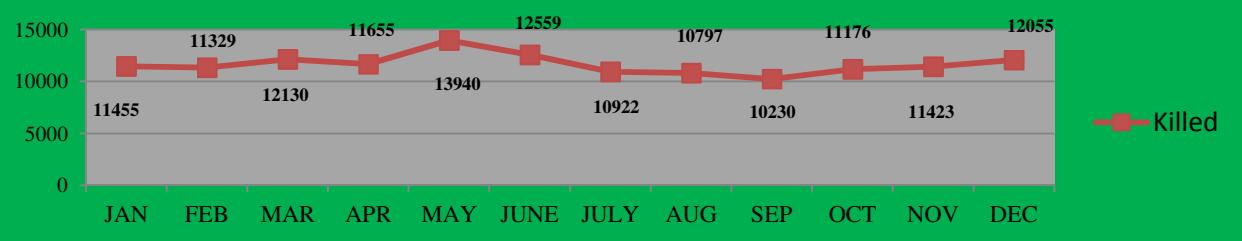

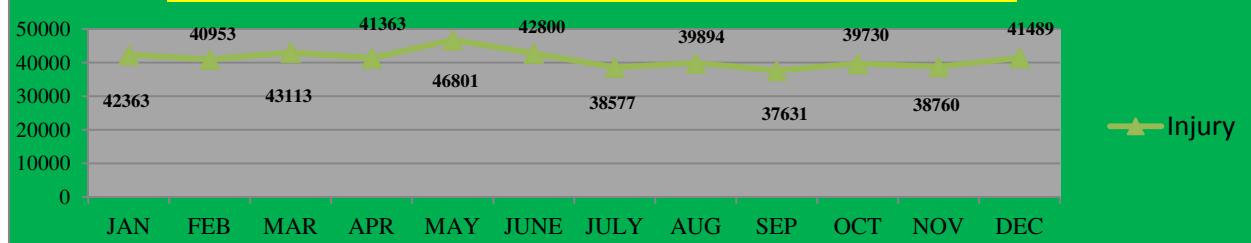

Chart 3.3 : Month - Wise Total Number of Persons Injured (2014)

It is seen from chart 3.1, 3.2 and 3.3 that the total number of accidents during 2014 were highest in the month of May, (45,404) and followed by the month of March (42,524) and June (42,448) perhaps due to tourist movement as a result of summer vacations in schools, marriage season etc.. Similarly, the total number of persons killed were highest in the month of May (13,940) followed by month of June (12,559). The number of persons injured were highest in the month of May (46,801) followed by the month of March (43,113). The States/UT wise distribution is given in Annexure-II.

Section IV: Inter State Comparison of Top Thirteen States

4.1 Number of Road Accidents

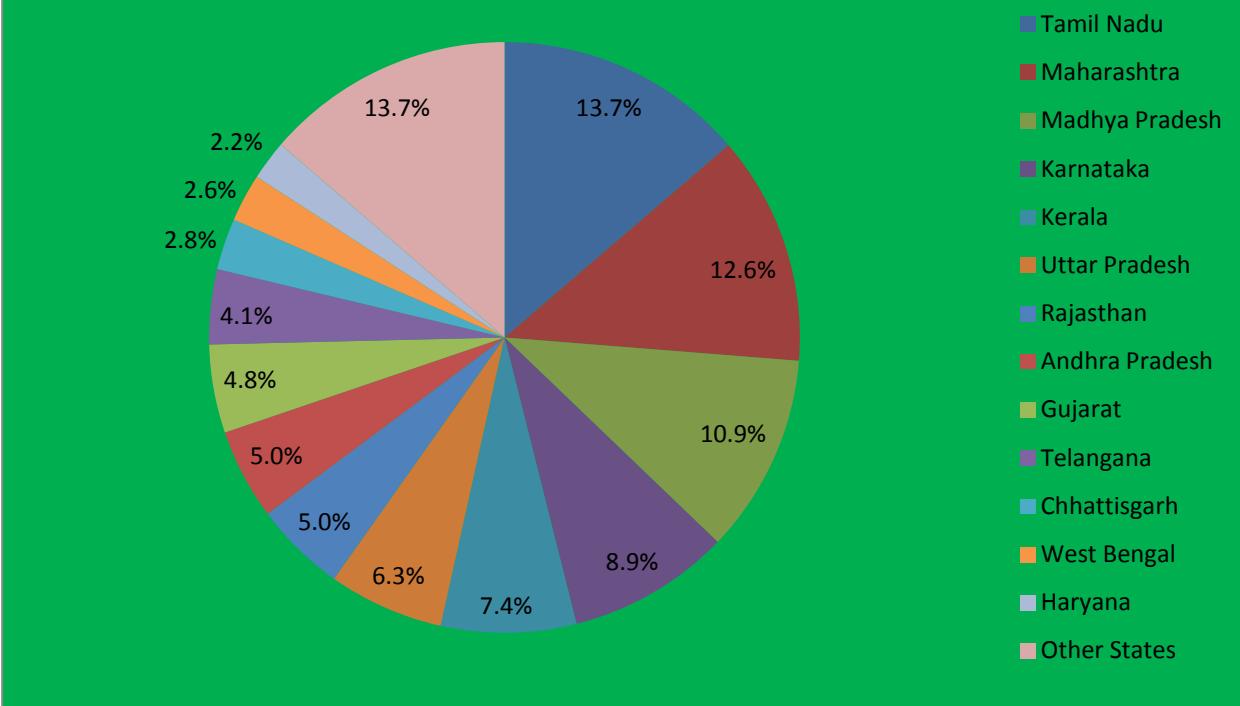

A comparison of States which accounted for more than 80 per cent of share in road accidents during the calendar year 2014 reveals that Tamil Nadu stood on top in road accidents in the entire country with a percentage share of 13.7 per cent followed by Maharashtra 12.6 per cent and Madhya Pradesh 10.9 per cent. A comparative analysis of top 13 States for the calendar year 2014 is tabulated below (Table4.1) and depicted in Chart4.1. These 13 States accounted for 86.3 per cent of total road accidents in the entire country.

Table 4.1: Top* 13 States: Share in Total Number of Road Accidents (in %)during the calendar year 2014.

Share of 13 States	86.3
1.Tamil Nadu	13.7
2.Maharashtra	12.6
3. Madhya Pradesh	10.9
4.Karnataka	8.9
5. Kerala	7.4
6.Uttar Pradesh	6.3
7. Rajasthan	5.0
8.Andhra Pradesh	5.0
9. Gujarat	4.8
10. Telangana	4.1
11. Chhattisgarh	2.8
12. West Bengal	2.6
13. Haryana	2.2

*Top 13 States according to their respective shares in 2014.

Chart 4.1: Percentage Share in Total Number of Road Accidents, 2014

The States of Tamil Nadu(67,250), Maharashtra(61,627), Madhya Pradesh(53,472), Karnataka(43,713), Kerala(36,282), Uttar Pradesh(31,034), Rajasthan(24,628), Andhra Pradesh(24,440), Gujarat(23,712), Telangana (20,078), Chhattisgarh(13,821), West Bengal(12,875) and Haryana(10,676)together accounted for 86.3 per cent of all road accidents in the country in the year 2014 [Table 4.1]. Tamil Nadu reported the highest number of road accidents in 2014, while Lakshadweep reported only one (1) road accident. An analysis of road accidents, in terms of per lakh population revealed that the highest number of road accidents were in Goa (221.0 per cent) while the lowest was in Lakshadweep.

4.2 Number of Persons Killed in Road Accidents

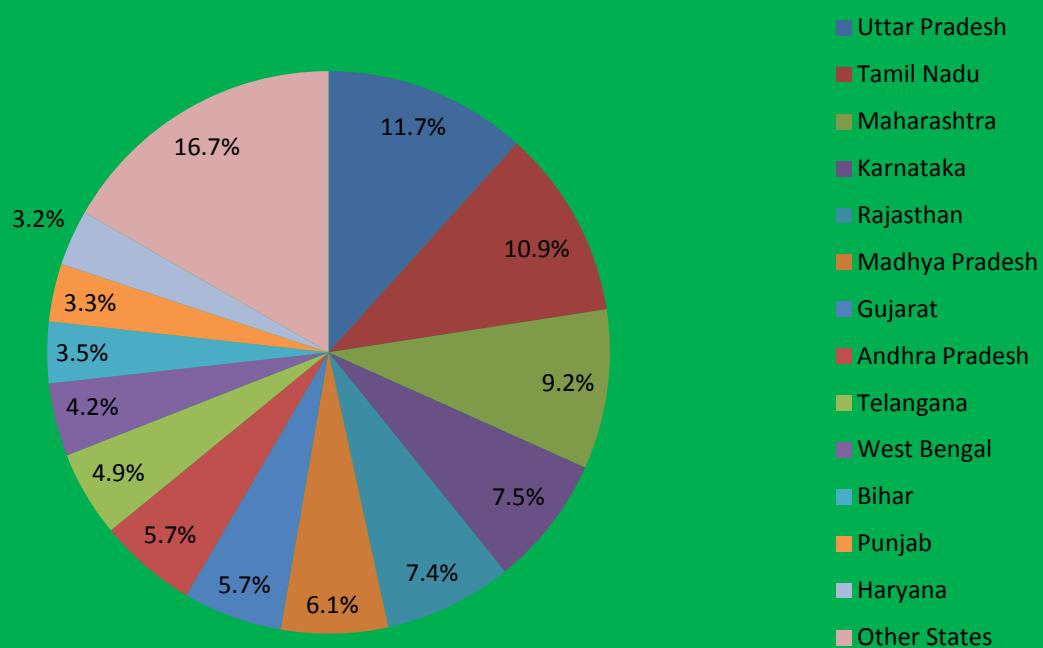

During 2014, as many as 1,39,671 persons were killed in road accidents in the States of Uttar Pradesh (16,287), Tamil Nadu (15,190), Maharashtra (12,803), Karnataka (10,452), Rajasthan (10,289), Madhya Pradesh (8,569), Gujarat (7,955), Andhra Pradesh (7,908) Telangana (6,906), West Bengal (5,875), Bihar (4913), Punjab (4,621), Haryana (4,483) and other States/UTs (23,420) 83.3 per cent of all road accident fatalities occurred in thirteen states [Table 4.2]. The highest number of persons killed per lakh of population was also in Tamil Nadu (22.1 per cent), leaving out Lakshadweep, where there was no road accident fatality. Nagaland reported the lowest number of road accident fatalities per lakh of population at (3.5 per cent).

Table 4.2: Top* 13 States: Share in Total Number of Persons Killed in Road Accidents (in %) in 2014

Share of 13 States	83.3
1. Uttar Pradesh	11.7
2. Tamil Nadu	10.9
3. Maharashtra	9.2
4. Karnataka	7.5
5. Rajasthan	7.4
6. Madhya Pradesh	6.1
7. Gujarat	5.7
8. Andhra Pradesh	5.7
9. Telangana	4.9
10. West Bengal	4.2
11. Bihar	3.5
12. Punjab	3.3
13. Haryana	3.2

*: Top 13 according to their respective shares in 2014

Chart 4.2: Percentage Share in Total Number of Persons Killed in Road Accidents (in %), 2014

4.3 Number of Persons Injured in Road Accidents

As reported by the States/UTs about 4,93,474 persons were injured in road accidents in the country during the calendar year 2014. Out of these 87.5 per cent was accounted by the Thirteen States of Tamil Nadu (77,725) followed by Karnataka (56,831), Madhya Pradesh (55,335), Kerala (41,096), Maharashtra (40,455), Andhra Pradesh (29,931), Rajasthan (27,453), Gujarat (22,493), Uttar Pradesh (22,337), Telangana (21,636), Chhattisgarh (13,157), West Bengal (12,018), and Odisha (11,087).

Table 4.3: Top* 13 States: Share in Total Number of Persons Injured in Road Accidents (in %) in 2014

Share of 13 States	87.5
1. Tamil Nadu	15.8
2. Karnataka	11.5
3. Madhya Pradesh	11.2
4. Kerala	8.3
5 .Maharashtra	8.2
6. Andhra Pradesh	6.1
7. Rajasthan	5.6
8. Gujarat	4.6
9.Uttar Pradesh	4.5
10. Telangana	4.4
11. Chhattisgarh	2.7
12. West Bengal	2.4
13. Odisha	2.2

*: Top 13 according to their respective shares in 2014

Chart 4.3: Percentage Share in Total Number of Persons Injured in Road Accidents (in %), 2014

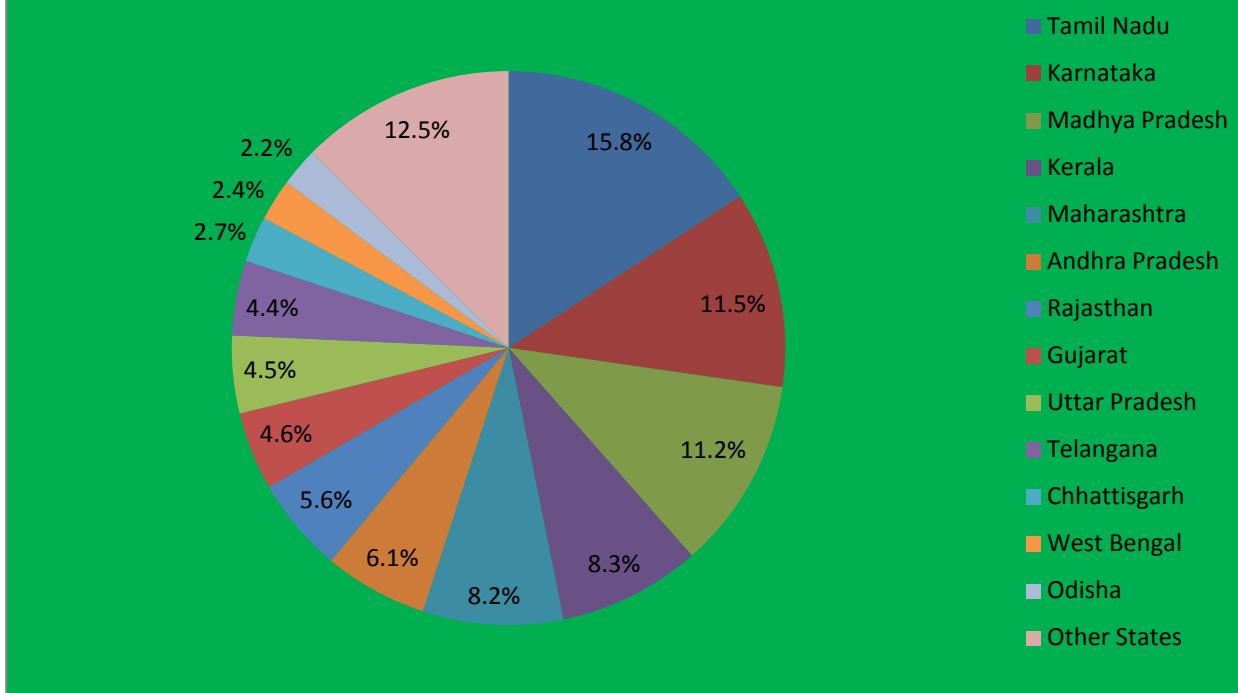

Table 4.1 to 4.3 describes the top 13 States which accounted for more than 80% of road accidents, persons killed and injured in road accidents in the country. There has been a shift in the ranking amongst the top 13 States of the country from the previous year which may be accrued to improvements by some states as well as by the bifurcation of Andhra Pradesh into Telangana and Andhra Pradesh.

Section V: Type of Road Accidents

Tamil Nadu accounted for 14,165 fatal accidents followed by Uttar Pradesh (13,842) and Maharashtra(11,528). Kerala (23,812) ranked first in the number of grievously injury accidents followed by Uttar Pradesh (13,916) Maharashtra (13,157) and Karnataka (12,742). Minor injury accidents was highest in Tamil Nadu (45,100) followed by Madhya Pradesh (36,160) and Karnataka (16,783). Type of road accidents, State/UT-wise in India is given in Annexure-VI.

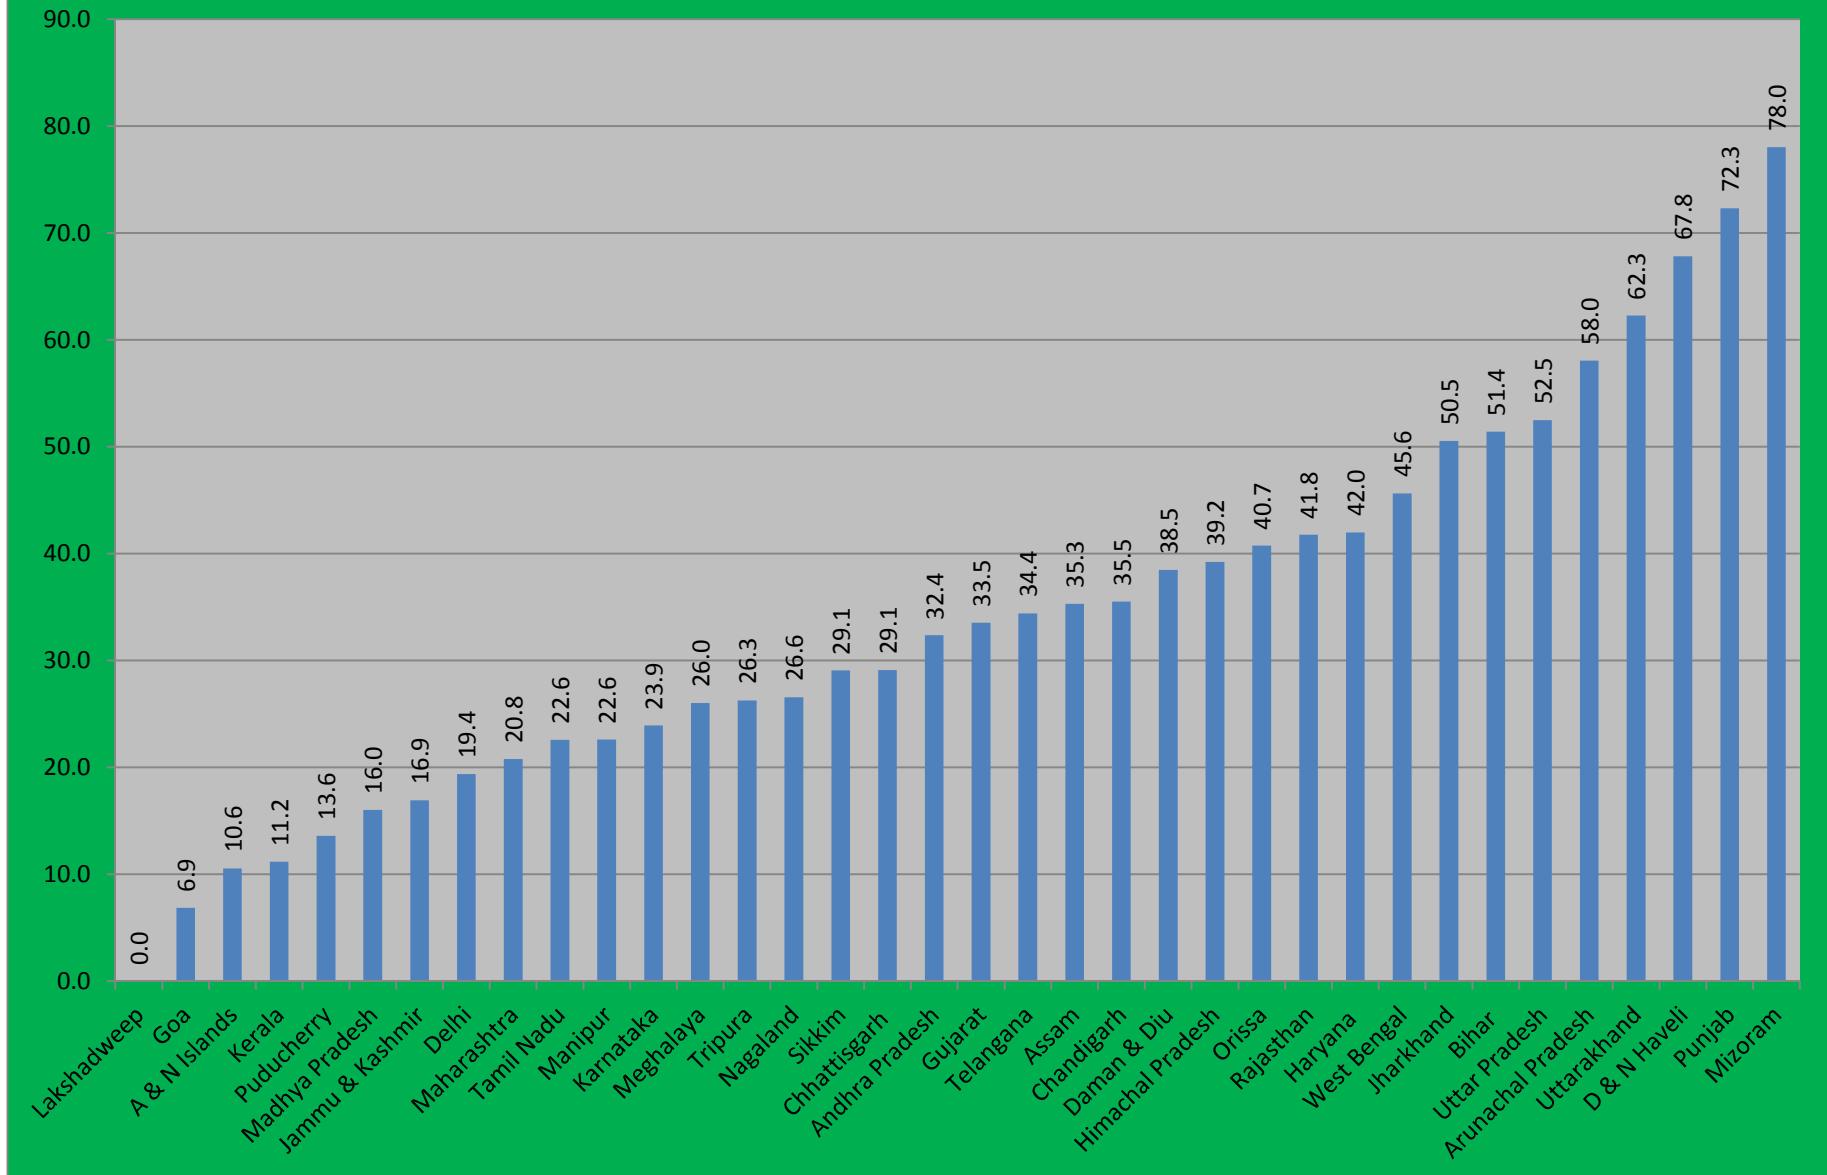

5.1 Severity of Road Accidents

In 2014, the highest accident severity (road accident death per 100 accidents) was reported in Mizoram (78.0%), followed by Punjab (72.3%), Dadra & Nagar Haveli (67.8%) and Uttarakhand (62.3%). The State/UT-wise severity of road accidents in India is given in Annexure-VII and chart 5.1

5.2 Accidents classified according to type of Injuries (Grievous Injury and Minor Injury)

During the year 2014 the state of Karnataka ranked highest (26,628) in the total number of persons grievously injured in the country followed by Kerala (26,219), Maharashtra (23,175) and Uttar Pradesh (14,786). Persons with minor injuries in road accidents were the highest in Tamil Nadu (70,344) followed by Madhya Pradesh (48,850), Karnataka (30,203) and Rajasthan (21,112). The total number of grievously injured and minor injured persons in the country during the calendar year 2014 were 1,77,839 and 3,15,635 respectively. The States/UT wise distribution is given Annexure-IX.

Chart 5.1 : Severity of Road Accidents across States/UTs during 2014

Section VI: Road Accidents, Deaths, Injuries and Severity in Million Plus Cities

Census of India 2011 has reported 53 Million Plus Cities. Out of these 53 cities, 50 Million Plus Cities reported road accident data for 2014. These 50 Million Plus Cities accounted for a share of 22.7 per cent in total road accidents in the country during 2014 as well as in 2013. In Million Plus Cities during 2014, 11.9 per cent persons were killed in road accidents as against 12.4 per cent in 2013. Whereas, 16.8 per cent persons were injured in road accidents in the country during 2014 as against 16.2 per cent in 2013. This is indicated in (Table 6.1).

An important accident related parameter is the extent of accident severity (road accident related deaths per 100 accidents). It varies from a low of 2.4 per cent in Mumbai to a high of 66.9 per cent in Ludhiana (Table 6.2). The other cities which reported a very high accident severity included Dhanbad (59.4 per cent), Amritsar (57.0 per cent), Varanasi (56.2 per cent), and Agra (50.6 per cent). This is depicted in Chart 6.1.

An illustrative table indicating the total number of accidents, persons killed and injured with details on grievous injuries, minor injuries and non-injuries in the 50 Million plus cities is at Annexure – XLIII.

Table 6.1 : Percentage Share of 50 Million Plus Cities in Road Accidents			
S. no	Accidents/Deaths/Injuries	2013	2014
1	All Accidents	22.7	22.7
2	Fatal Accidents	13.1	12.8
3	Persons Killed	12.4	11.9
4	Persons Injured	16.2	16.8

Out of these fifty Million plus Cities Mumbai had the highest number of road accidents (22,570) during 2014 as against (23,512) in 2013, while Delhi had the highest number of deaths (1671) due to road accidents during 2014 as against 1820 during 2013.

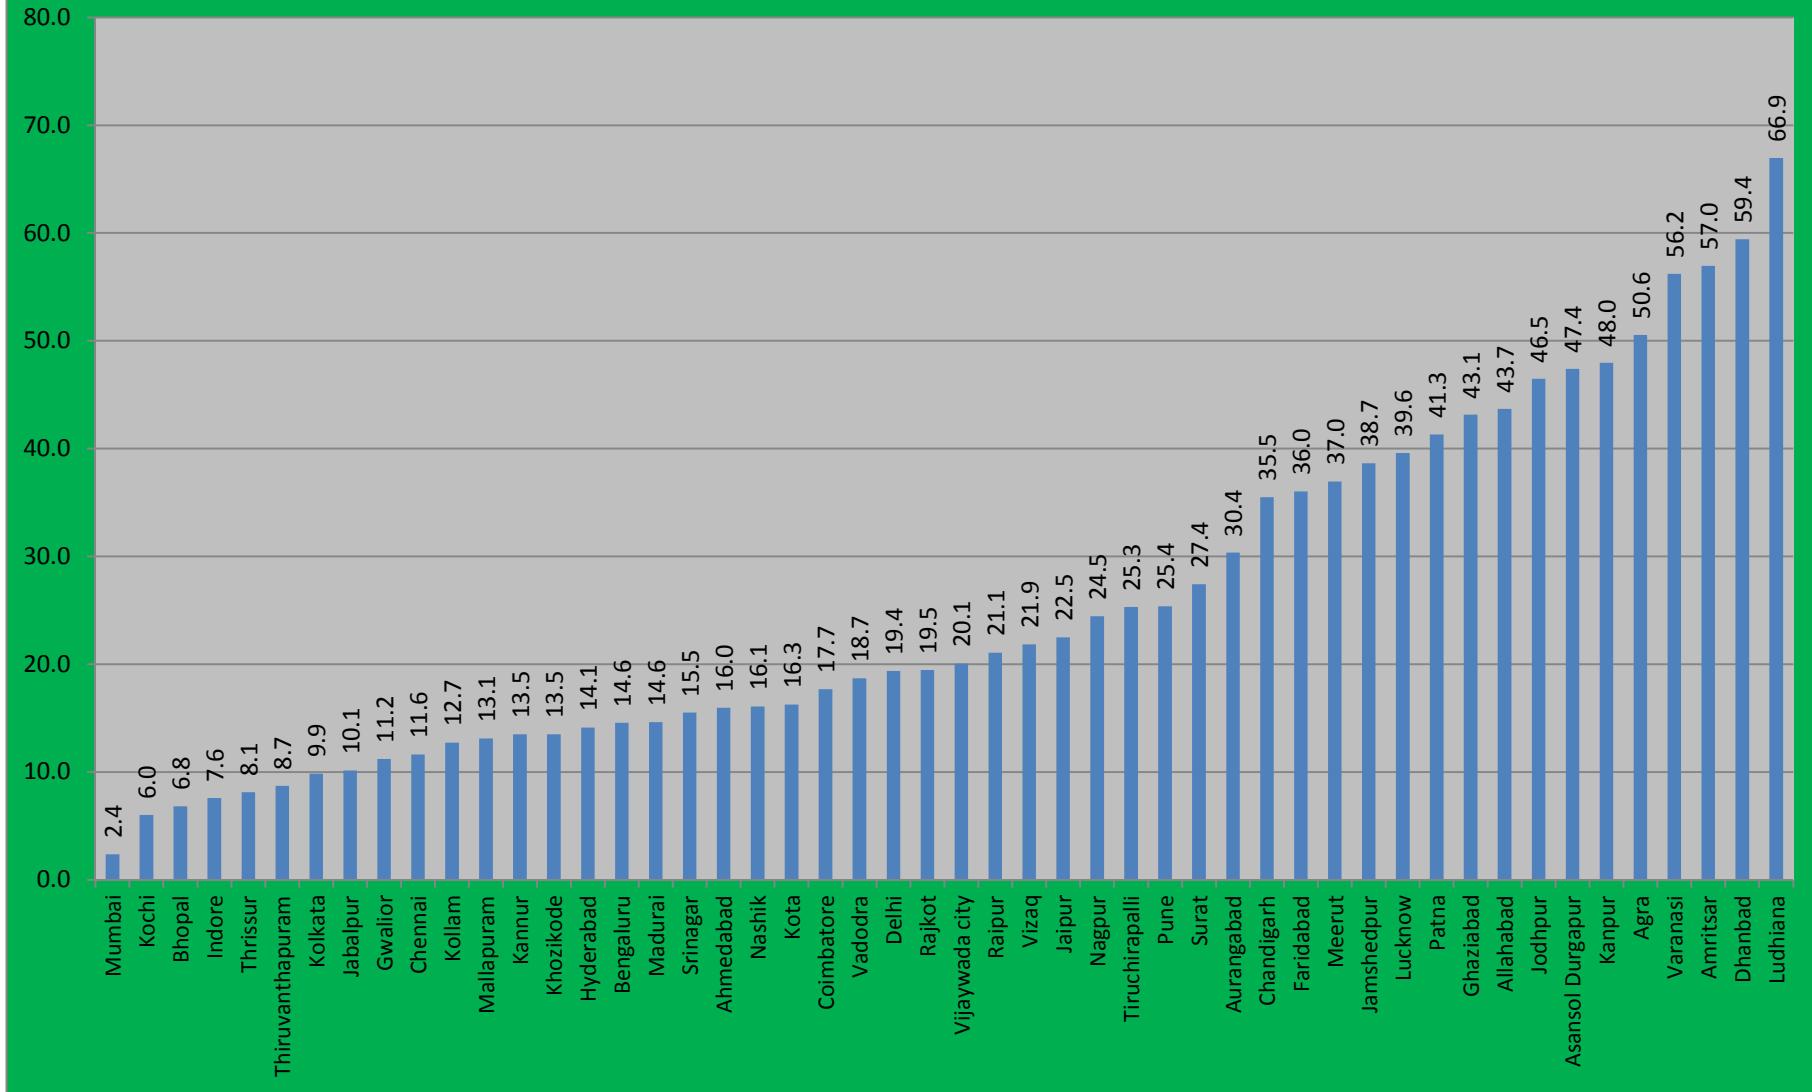

Accident severity in terms of percentage share of 50 Million Plus cities was 15.0 per cent in 2014 as against 15.4 per cent in 2013. The fatal accidents in terms of percentage have declined from 13.1 during 2013 to 12.8 in the year 2014. Percentage share of persons killed have also reduced from 12.4 during 2013 to 11.9 in the year 2014.(Table 6.1)

Table 6.2 : Road Accident Profile of Million Plus Cities (2014)

Sl. No.	Name of Cities	Fatal Accidents	Total Accidents	Killed	Injured	Severity
1	Agra	405	995	503	747	50.6
2	Ahmedabad	256	1,642	262	1,597	16.0
3	Allahabad	454	1,101	481	758	43.7
4	Amritsar	89	165	94	125	57.0
5	Asansol Durgapur	195	443	210	284	47.4
6	Aurangabad	161	560	170	578	30.4
7	Bengaluru	703	5,004	729	4,098	14.6

49	Vijaywada city	314	1,669	335	1,578	20.1
50	Vizag	329	1,565	342	1,356	21.9
Total 50 Million Plus Cities		15,745	1,10,958	16,611	83,000	15.0
All India Total		1,22,589	4,89,400	1,39,617	4,93,474	28.5

Note: * Accident Severity: Road Accident deaths per 100 accidents

Chart 6.1: Accident Severity in Million Plus Cities 2014

Section VII: Accidents, Deaths and Injuries in terms of Classification of Roads

National Highways accounted for a share of 28.2 per cent in total road accidents and 34.1 per cent in total number of persons killed in road accidents during 2014. The State Highways accounted for a share of 25.2 per cent of total accidents and 29.1 per cent in the total number of persons killed in road accidents during same period of time (Tables 7.1 and 7.2)

Whereas Other Roads accounted for highest share of 46.6 per cent in total road accidents and 36.8 per cent in total number of persons killed in road accidents during 2014. State- wise break up of accidents, injuries and fatalities due to road accidents on stretches of National and State Highways in India are given in Annexure – XII to XVIII.

Chart 7.1 depicts the percentage share of accidents, persons killed and injured as per road classification during the calendar year 2014.

Table 7.1 : Percentage Share of National Highways, State Highways and Other Roads in Total Road Accidents, Persons Killed and Injured: 2002 to 2014

Year	National Highways			State Highways			Other Roads		
	Road Accidents	Persons Killed	Persons Injured	Road Accidents	Persons Killed	Persons Injured	Road Accidents	Persons Killed	Persons Injured
2002	32.3	39.7	32.4	23.5	27.2	25.4	44.2	33.1	42.2
2003	31.4	38.6	30.1	22.4	28.2	26.7	46.2	33.2	43.2
2004	30.3	37.5	30.8	23.5	26.9	24.9	46.2	35.6	44.3
2005	29.6	37.3	31.3	23.6	27.2	25.7	46.8	35.5	43.0
2006	30.4	37.7	30.8	18.5	26.8	24.9	51.1	35.5	44.3
2007	29	35.5	30.2	24.4	27.7	26.2	46.6	36.8	43.6
2008	28.5	35.6	28.6	25.6	28.4	27.5	45.9	36	43.9
2009	29.3	36	29.6	23.8	27.1	25.5	46.9	36.9	44.9
2010	30	36.1	31.3	24.5	27.3	26.0	45.5	36.6	42.7
2011	30.1	37.1	30.5	24.6	27.4	26.1	45.3	35.5	43.4
2012	29.1	35.3	30.1	24.2	27.3	25.9	46.7	37.4	44.0
2013	28.1	33.2	28.9	25.6	29.6	27.6	46.3	37.2	43.5
2014	28.2	34.1	29.9	25.2	29.1	26.8	46.6	36.8	43.3

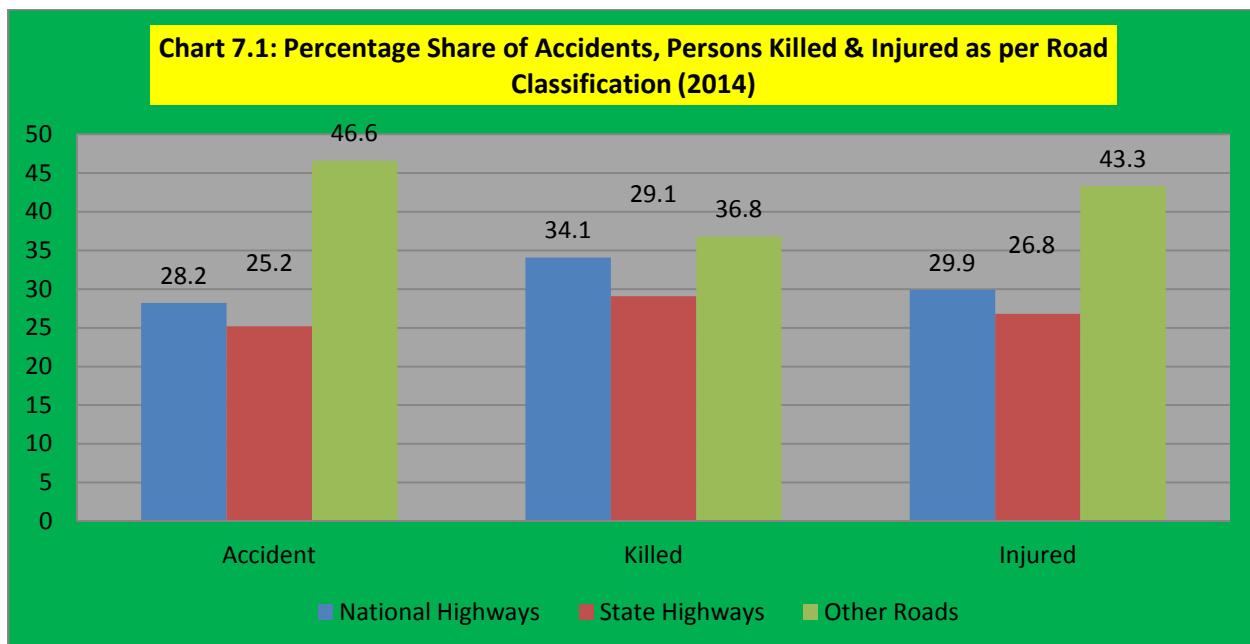

Table 7.2 : Number of Accidents, Persons Killed & Injured as per Road Classification (2014)			
Road Classification	National Highways	State Highways	Other Roads
No. of Accidents	1,37,903 (28.2)	1,23,408 (25.2)	2,28,089 (46.6)
No. of Persons Killed	47,649 (34.1)	40,678 (29.1)	51,344 (36.8)
No. of Persons Injured	1,47,696 (29.9)	1,31,959 (26.8)	2,13,819(43.3)

Note: Figures within parentheses indicate share in total accidents, killed and injured in the respective road categories.

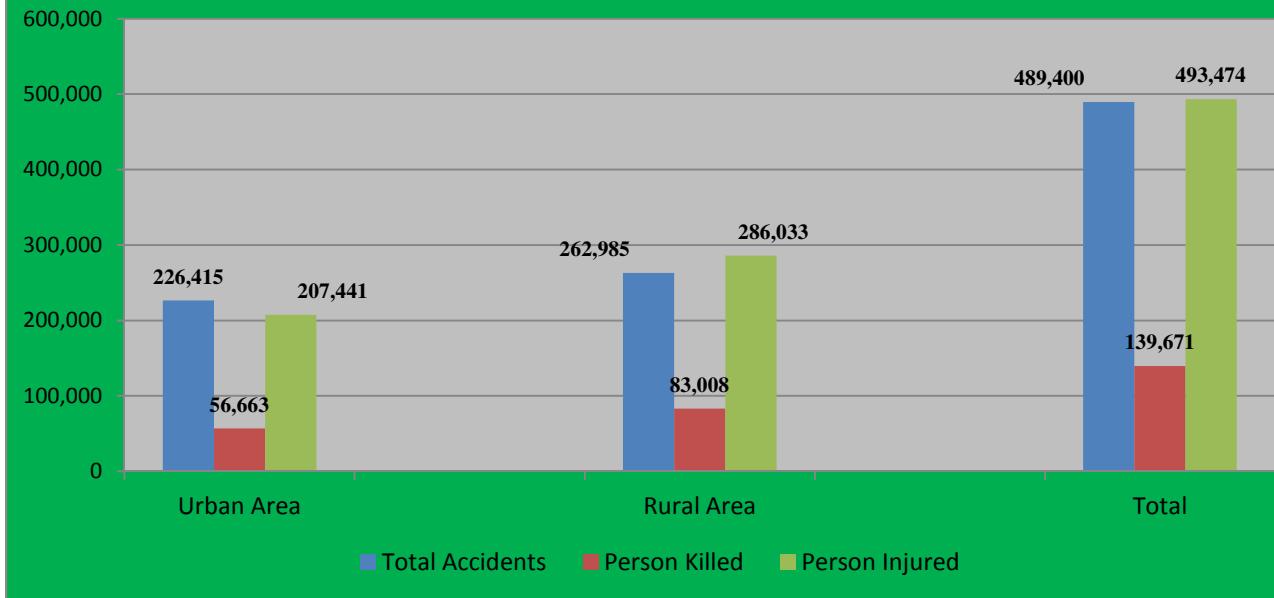

Section VIII: Spatial Distribution of Road Accidents (Urban vis-à-vis Rural)

An analysis of road accidents in urban and rural areas for the calendar year 2014 reveals that rural areas are prone to accidents. The total number of road accidents in rural areas were 2,62,985 while number of accidents in urban areas were only 2,26,415. The percentage share of accidents in rural areas and urban areas were 53.7 and 46.3 respectively in total number of accidents in the country. The percentage of road accident fatalities 59.4 per cent and injuries 58.0 per cent were more in rural areas as compared to the percentage share of road accidents fatalities 40.6 per cent and injuries 42.0 per cent in urban areas respectively. This indicates that significant improvement in rural infrastructure is required for reducing accidents in rural areas. This is indicated in Table 8.1. Detailed State/UT-wise information may be seen at Annexure-X. A comparative picture of road accidents, persons killed and injured in urban and rural areas is illustrated in Chart 8.1

Table 8.1 : Total Accidents, Persons Killed and Injured in Rural & Urban Areas during 2014				
(in Numbers)				
Category	Fatal Accidents	Total Accidents	Person Killed	Person Injured
Urban Area	48,990 (38.9)	2,26,415(46.3)	56,663(40.6)	2,07,441(42.0)
Rural Area	76,838 (61.1)	2,62,985(53.7)	83,008(59.4)	2,86,033(58.0)
Total	1,25,828 (100.0)	4,89,400(100.0)	1,39,671(100.0)	4,93,474(100.0)

Note: Figures in parentheses indicate share of the total.

Chart 8.1: Total Accidents, Persons Killed and Injured in Urban & Rural Areas (2014)

In the above context, it may be mentioned that during the calendar year 2013, the total number of road accidents that had occurred in rural areas were 54.2 percent as against 53.7 per cent in 2014 and fatalities accounted for 61.8 per cent during the calendar year 2013 in the country as against 59.4 per cent during 2014. The injury due to road accidents was at 59.8 percent during 2013 as against 58.0 percent in 2014. It indicates marginal improvements during 2014 in terms of total accidents, persons killed and injured as compared to the year 2013 in rural areas.

Section IX: Based on Accidents classified in terms of involvement by Vehicle type

Motorized vehicles accounted for 93.5 per cent of the total road accidents during the calendar year 2014. Amongst the vehicle categories, two-wheelers accounted for the highest share in total road accidents (27.3 per cent) in 2014 followed by cars, jeeps and taxis (22.7 per cent); trucks, tempos, tractors and other Articulated vehicles (19.7 per cent), Other motor vehicles (9 per cent), buses (8.4 per cent) and Auto-Rickshaws (6.4 per cent). During 2013, two wheelers accounted for 26.3 percent of accidents and cars, jeeps & taxis were responsible for 22.2 percent of accidents. The total number and percentage share of accidents, persons killed and injured during 2014 based on the involvement by vehicle type is indicated in table 9.1. Details of accidents in terms of vehicle typology are given in Annexure-XXIII. The category of trucks, tempos, tractors and other Articulated vehicles accounted for the highest proportion of persons killed (25.6 per cent) out of the total number of persons killed in the country during the calendar year 2014.

Table 9.1: Total number of accidents, persons killed and injured based on the involvement by vehicle type during 2014

	Number of Road Accidents		Number of Persons	
	Fatal	Total	Killed	Injured
Two-Wheelers	30,064 (23.9)	1,33,634 (27.3)	32,524 (23.3)	1,27,452 (25.8)
Auto-Rickshaws	5,553 (4.4)	31,172 (6.4)	6,279 (4.5)	40,848 (8.3)
Cars, Jeeps, Taxis	22,803 (18.1)	1,11,218 (22.7)	26,038 (18.6)	1,13,413 (23.0)
Buses	10,710 (8.5)	41,365 (8.4)	12,185 (8.7)	51,356 (10.4)
Trucks, Tempos, Tractors and other Articulated vehicles	32,081 (25.5)	96,215 (19.7)	35,711 (25.6)	94,532 (19.2)
Other Motor Vehicles	14,603 (11.6)	43,981 (9.0)	15,380 (11.0)	39,006 (7.9)
Non-Motorized Vehicles/Objects*	10,014 (8.0)	31,815 (6.5)	11,554 (8.3)	26,867 (5.4)

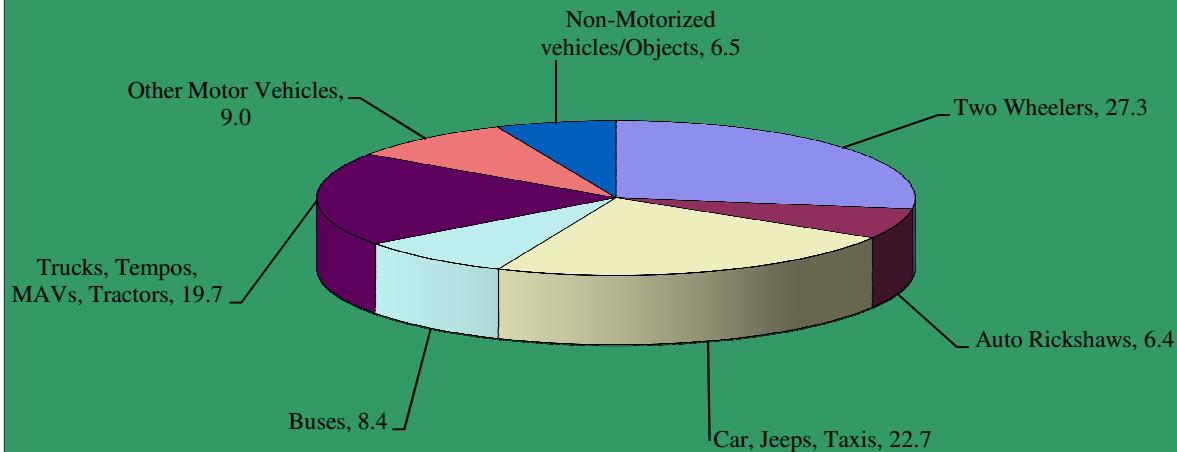

Note: Two-Wheelers include motor cycles, scooters and mopeds.

*Non-Motorized Vehicles/Objects include cycles, cycle rickshaws, hand-drawn vehicles, pedestrians, animals, trees, level-crossings and other fixed objects.

** Figures in parenthesis are the percentage share

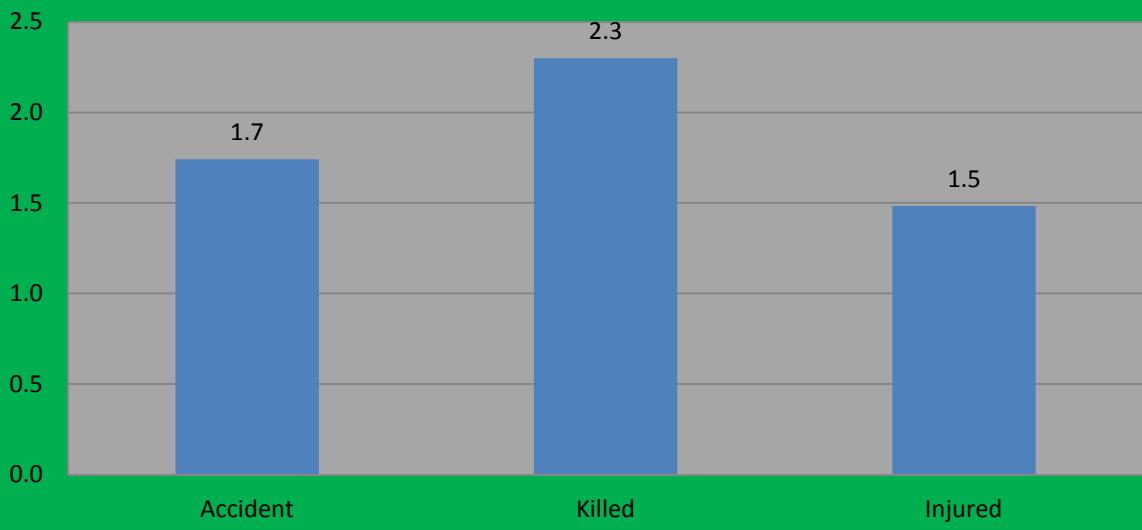

The share of various vehicle categories in total road accidents, persons killed and persons injured in road accidents is illustrated in Chart 9.1.

Chart 9.1 : Percentage Share in Total Road Accidents by Type of Motor Vehicle Involved : 2014

The share of accidents, persons killed and injured in total accidents, persons killed and injured in the country caused by non-motorized vehicles such as cycles, cycle rickshaws, hand-drawn and animal drawn vehicles are 1.74 per cent, 2.28 per cent and 1.47 per cent respectively. Chart 9.2 illustrates the percentage share of non-motorized vehicle accidents, persons killed and injured. The States/UT wise distribution of total number of accidents/ persons killed and injured caused by non-motorized vehicle is given at Annexure-XXIV.

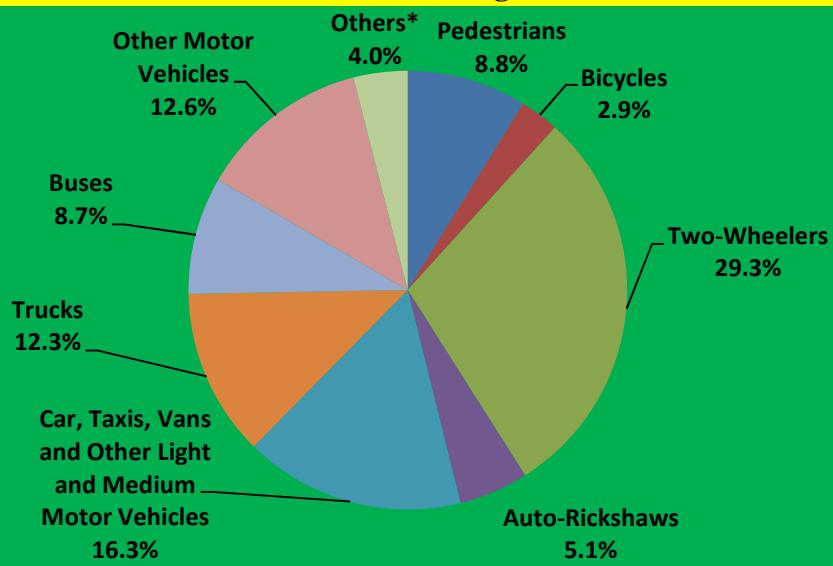

Chart 9.2 : Number of accidents, persons killed and injured due to Non-Motorised vehicles : 2014

Persons killed in road accidents in terms of Road User Categories

Two-wheelers (29.3 per cent) are the most vulnerable and unprotected road users killed in road accidents in the country. Other road users killed in road accidents are cars, taxies, vans and other light and medium motor vehicles (16.3 per cent), other motor vehicles (12.6 per cent), trucks (12.3 per cent), pedestrians (8.8 per cent), buses (8.7 per cent), auto rickshaws (5.1 per cent) and others (4.0 per cent). This is portrayed in Chart 9.3. State/UT-wise data in respect of number of persons killed in road accidents in term of road user categories is given in Annexure-XXXVII.

Chart 9.3 : Total Number of Persons Killed in Road Accidents in terms of Road User Categories: 2014

* Includes: Animal Drawn Vehicles, Cycle Rickshaws, Hand Carts, Rickshaws and Other Persons

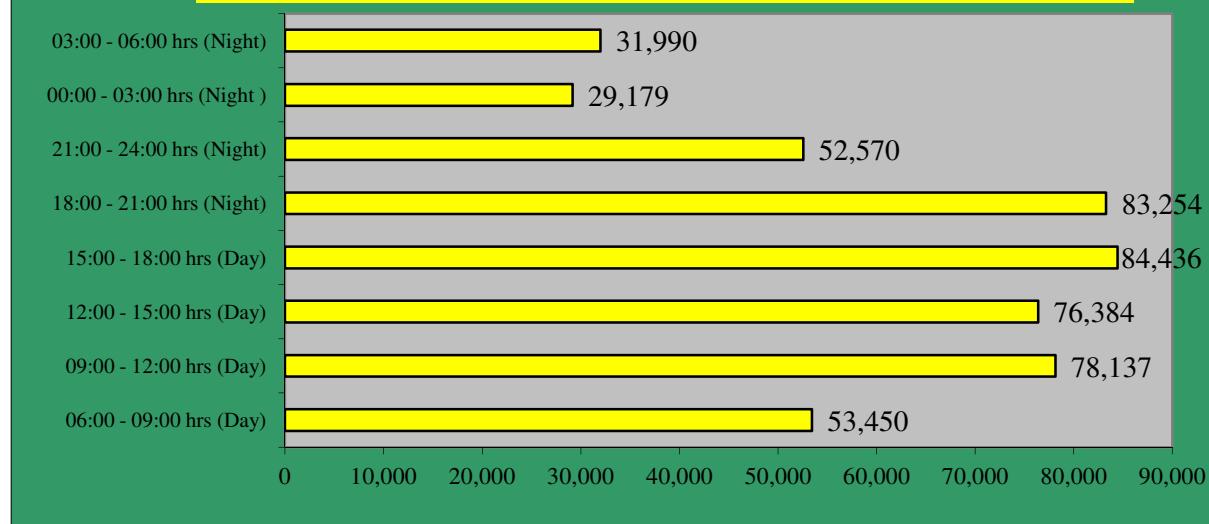

Section X: Time of Occurrence of Road Accidents

For framing strategies for prevention and provision of medical care for accident victims, timing of accidents is a relevant factor. During 2014 high rate of accidents took place between 15:00 to 21:00 hours followed by 09:00 hours to 12:00 hours and 12:00 hours and 15:00 hours. This is shown in table 10.1 and Chart 10.1. State/UT wise details are at Annexure-XX.

Table 10.1 : Road Accidents as per the Time of Occurrence(2014)

Time	Number of Accidents	Per cent Share in total Accidents
06:00 - 09:00 hrs (Day)	53,450	10.9
09:00 - 12:00 hrs (Day)	78,137	16.0
12:00 - 15:00 hrs (Day)	76,384	15.6
15:00 - 18:00 hrs (Day)	84,436	17.3
18:00 - 21:00 hrs (Night)	83,254	17.0
21:00 - 24:00 hrs (Night)	52,570	10.7
00:00 - 03:00 hrs (Night)	29,179	6.0
03:00 - 06:00 hrs (Night)	31,990	6.5
Total 24 hrs	4,89,400	100.0

Chart 10.1: Distribution of Total No. of Road Accidents as per time of Occurrence: 2014

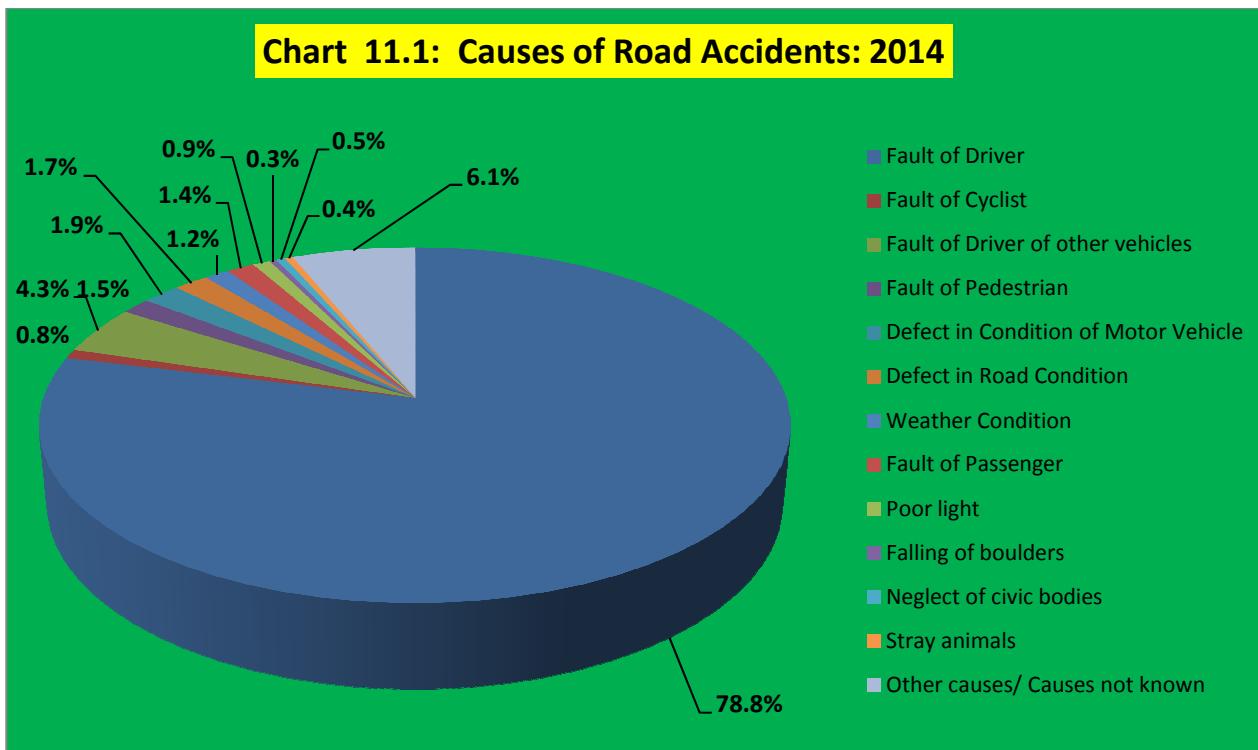

Section XI: Nature and Causes of Road Accidents

The analysis of road accidents in terms of causal factors reveals that drivers' fault is single most important factor responsible for accidents, followed by fault of drivers of other vehicles, defects in motor vehicles, defect in road conditions and faults of pedestrians. Drivers' fault accounted for 78.8 per cent of total road accidents, 73.7 per cent of the total number of persons killed and 81.1 per cent of the total number of persons injured in road accidents during 2014. This is shown in Table 11.1 and Chart 11.1. Faults of the cyclists and pedestrians appear to be of marginal consequence having a share of 0.8 per cent and 1.5 per cent, respectively, in road accidents during 2014. Cyclists and pedestrians were responsible for about 1.2 per cent and 1.9 per cent, respectively, of total number of persons killed in road accidents. Causes of accidents across the States/UTs are provided in Annexure-XXVII.

Table 11.1: Accidents classified according to Causes: 2014

	Accidents	Killed	Injured
Fault of Driver	3,78,992	1,02,878	3,93,340
Fault of Cyclist	4,067	1,564	3,833
Fault of Driver of other vehicles	20,876	5,295	16,148
Fault of Pedestrian	7,191	2,555	6,331
Defect in Condition of Motor Vehicle	9,196	3,548	8,450
Defect in Road Condition	8,356	3,463	7,496
Weather Condition	5,961	2,554	5,477
Fault of Passenger	6,721	2,678	6,101
Poor light	4,210	1,802	4,394
Falling of boulders	1,664	744	1,988
Neglect of civic bodies	2,188	915	1,867
Stray animals	1,892	774	2,237
Other causes/ Causes not known	29,463	10,901	27,529

* Total no. of accidents and persons injured may not tally due to data not reported from Delhi

11.1 During 2014, within the category of drivers' fault, accidents caused and persons killed due to 'Exceeding lawful speed', accounted for a high share of 55.0 per cent (2,08,271 out of 3,78,992 accidents) and 56.2 per cent (57,844 out of 1,02,878 deaths), respectively. State/UT-wise details are given at Annexure-XXXII.

11.2 Intake of alcohol / drugs by drivers resulted in 18,916 road accidents and 6,968 fatalities in 2014. As a proportion of total road accidents and fatalities due to intake of alcohol/drugs accounted for 5.0 per cent and 6.8 per cent respectively. State/UT-wise details are given at Annexure-XXXII.

Analysis of other parameters of road accidents:

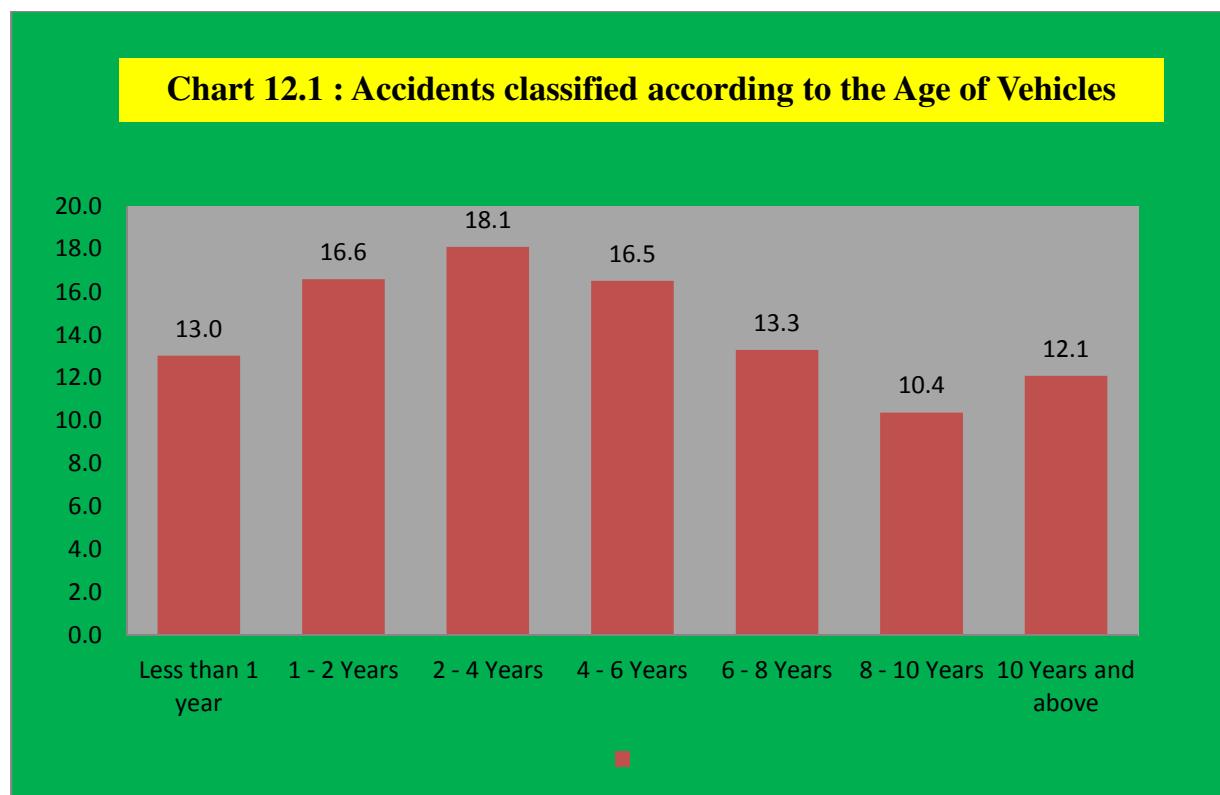

- During the year 2014, overloaded vehicles caused 91,335 road accidents and 26,809 accidental deaths. It constituted a share of 18.7 per cent and 19.2 per cent respectively in total road accidents and fatalities in the country. However, during 2013 overloading of vehicles accounted for 95,441 road accidents (19.6 per cent) and 28,655 road accident fatalities (20.8 per cent) respectively. The States/UT wise distribution is given at Annexure-XXXV.
- During the calendar year 2014, the total number of Hit and Run cases reported were 53,334 which were higher by 7.6 per cent as compared to 49,576 accidents reported in the year 2013. The number of persons killed due to Hit and Run cases reported were 19,569 which were higher by 4.6 per cent in 2014 as compared to the preceding year. State/U.Ts wise details are given in Annexure - XXVI
- Defective vehicles are also one of the reasons for accidents. 23,645 accidents and 7,179 deaths occurred during 2014, due to defective vehicles accounting for a share of 4.9 percent and 5.2 per cent respectively in total road accidents and deaths in the country. The States/UTs wise distribution is given at Annexure-XXXIII.
- It has been observed that 3,10,121 accidents occurred during fine weather conditions which constituted a share of 64.5 per cent of the total road accidents in the country. Some of the other accidents based on weather conditions are rain, Mist/fog, Dust storm etc. The State/UT wise distribution is given at Annexure-XXII.
- Accidents due to Head on Collision was as high as 99,889 during 2014 resulting in 27,740 deaths accounting for a share of 20.8 per cent and 19.9 per cent respectively in total road accidents and fatalities in the country. Overturning, Rear end Collision and Hit and Run cases are also high next to Head on Collision cases. The States/UT wise distribution is given at Annexure-XXVI.
- Potholes accounted for a share of 2.3 per cent (11,106 road accidents) and 2.2 per cent (3,039 road accident fatalities) during 2014. The State/UT-wise details indicating various road conditions are given at Annexure-XXXVIII.
- Speed breakers accounted for 2.3 per cent (11,008 road accidents) and 2.6 per cent (3,633 road accident fatalities) during 2014. The State/UT-wise details indicating various road conditions are given at Annexure-XXXVIII.
- Some of the factors responsible for accidents are also based on locations such as near or inside villages, near religious places, near hospitals etc. 1,47,948 accidents and 45,361 resultant deaths occurred at open area with a share of about 30.7 percent and 32.9 per cent respectively. Near or inside village locations constituted about 65,320 accidents and 21,081 deaths with a share of 13.6 per cent and 15.3 per cent respectively. The State/UT-wise details are given at Annexure-XIX.

Section XII: Classification based on Age of Vehicles

Based on classification of age of vehicles, during the calendar year 2014, vehicles ranging from 2 to 4 years old recorded the highest number of accidents (86,956) in the country, accounting for a share of 18.1 per cent in total road accident(excluding Delhi and Chandigarh) with 24,494 deaths and 93,140 injuries. The State/UT wise distribution is given at Annexure-XXV. The table indicating the total number of accidents, persons killed and injured is shown in table 12.1 and Chart 12.1 indicates the percentage share in accidents based on age of the vehicles.

Table 12.1 Total number of accidents, persons killed and injured based on Age of Vehicles (2014)			
	Accidents	Killed	Injured
Less than 1 year	62,567	17,468	63,854
1 - 2 Years	79,728	22,128	80,404
2 - 4 Years	86,956	24,494	93,140
4 - 6 Years	79,380	23,185	82,094
6 - 8 Years	63,888	18,434	65,092
8 - 10 Years	49,833	14,488	49,615
10 Years and above	58,056	17,672	50,657

* Total no. of accidents and persons injured may not tally due to not reporting from Delhi and Chandigarh

Section XIII: Classification based on Age of Persons Killed (Gender wise) in Road Accidents

The gender wise comparison in respect of male and female in accidental deaths revealed that the total number of males and females killed during the calendar year 2014 were 1,12,863 (80.8 per cent) and 26,808 (19.2 per cent) respectively. During 2014, age group between 25-34 years was most vulnerable to road accidental death. The total number of persons killed in road accidents amongst male and female in the age group 25-34 years were 22,545(20 per cent) and 4,784 (17.8 per cent) respectively. This is depicted in Chart 13.1. The States/UTs wise distribution is given at Annexure-XXVIII.

Table 13.1: Age of Persons Killed (Gender wise)		
	Male	Female
Less than 5 years	433	211
6-9 Years	1,103	558
10-14 Years	2,880	1,269
15-17 Years	5,905	1,732
18-20 Years	12,789	3,072
21- 24 Years	20,385	3,836
25- 34 Years	22,545	4,784
35- 44 Years	19,635	4,271
45- 54 Years	13,895	3,042
55-64 Years	7,009	1,988
65 and Above	3,274	1,241
Unknown Age	3,010	804
Total	1,12,863(80.8)	26,808(19.2)
*Figures in parenthesis are percentage of persons killed in total accidents		

Chart 13.1 : Age of Persons (Genderwise) killed in road accidents (2014)

Section XIV: Age profile of Road Accident victims (Passengers and drivers)

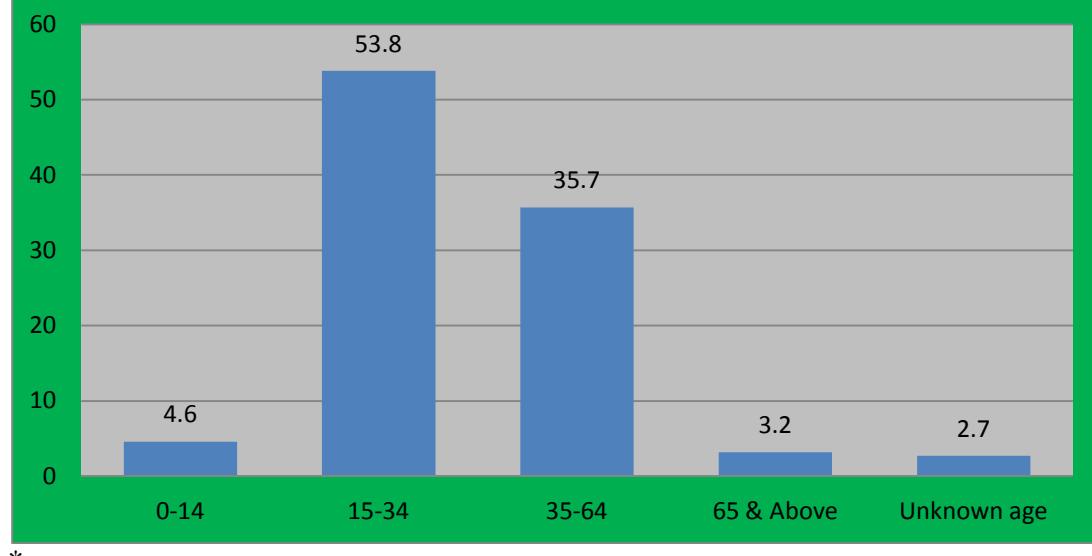

Young people in the productive age group lose their lives in road accidents every year. Premature deaths of such young people cause substantial loss of productivity to the nation. The detailed age profile of road accidents victims for the calendar year 2014 reveals that the age group 15 to 34 years accounted for the largest share of 53.8 per cent (75048 persons) in total road accident fatalities, followed by age group of 35 to 64 years accounting for a share of 35.7 per cent (49840 persons). The details of other age profiles are indicated in table 14.1 and chart 14.1 respectively. The details of fatalities in respect of male and female category are at Annexure XXIX.

Table 14.1: Age profile of Road Accident victims (Passengers as well as drivers)

Age - group	Number of persons killed
0-14	6,454 (4.6)
15-34	75,048 (53.8)
35-64	49,840 (35.7)
65 & Above	4,515 (3.2)
Unknown age	3,814 (2.7)
Total	1,39,671

*Figures in parenthesis are percentage of persons killed in total accidents

Chart 14.1: Age profile of Road Accident victims (Passengers as well as drivers) during 2014

*

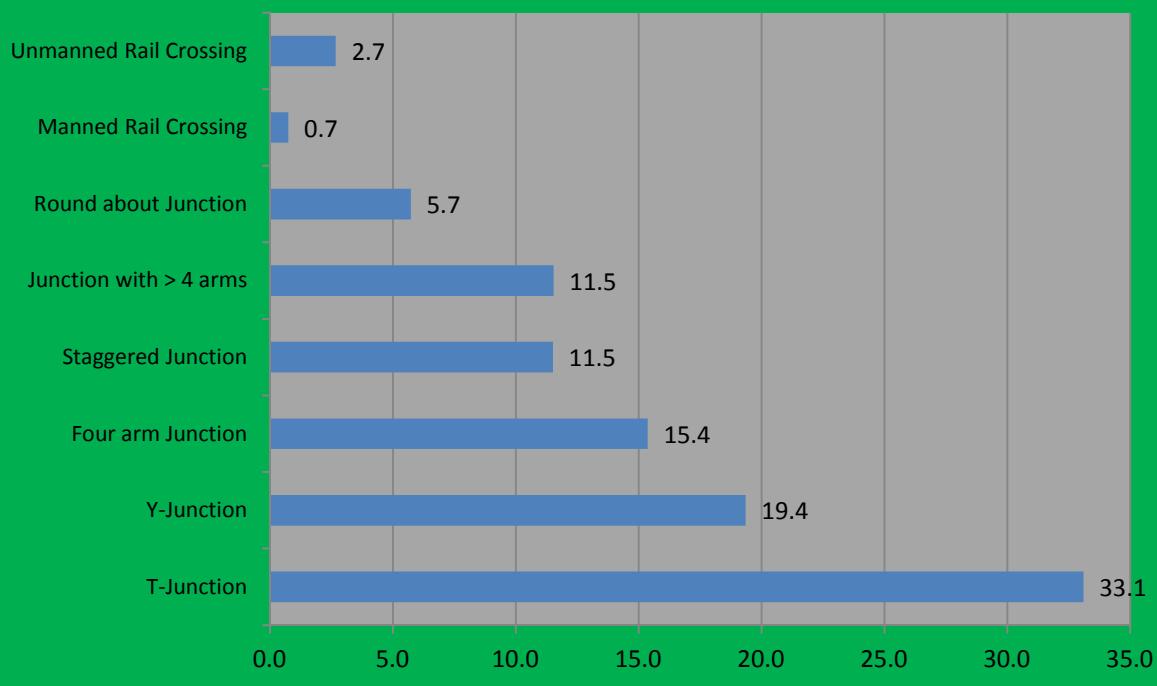

Section XV: Accidents based on classification of Junction Type

Traffic Junctions are prone to accidents. During the calendar year 2014, the highest number of accidents occurred at T-Junctions causing 92,411 accidents with a share of 33.1 per cent of the total road accidents. The details regarding total accidents, persons killed and injured are given in table 15.1. The percentage wise distribution of accidents at junctions is depicted at charts 15.1. The States/UT wise distribution is given at Annexure-XL.

Table 15.1 Total number of accidents, persons killed and injured based on Junction Type (2014)

	Accidents	Killed	Injured
T-Junction	92,411	23,420	89,904
Y-Junction	54,017	13,897	47,905
Four arm Junction	42,891	11,789	41,934
Staggered Junction	32,124	9,301	25,137
Junction with > 4 arms	32,202	7,518	34,109
Round about Junction	15,999	4,465	13,929
Manned Rail Crossing	2,085	715	1,994
Unmanned Rail Crossing	7,467	2,310	7,571

Chart 15.1: Accidents Classified according to Type of Junctions (2014)

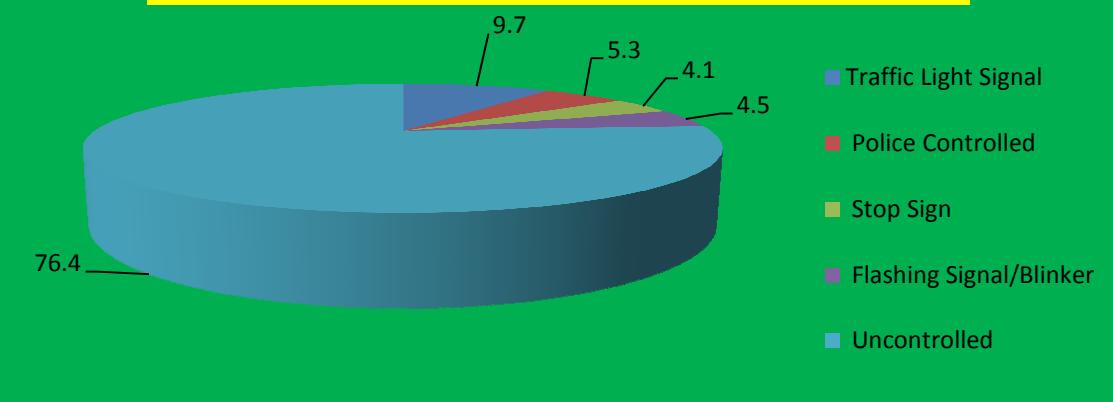

Section XVI: Accidents at Traffic/ Police controlled areas on Junctions

If we examine accidents at traffic/police controlled areas and uncontrolled areas, it may be seen that the maximum number of accidents occurred at uncontrolled areas which caused 2,13,322 accidents with a share of (76.4 percent) in total road accidents in this category. The details regarding road accidents at Traffic Controlled/ Police controlled areas indicating the total accidents; persons killed and injured are given in table 16.1. Chart 16.1 depicts the percentage distribution of accidents based on accidents at Traffic Controlled/ Police controlled. The States/UT wise distribution is given at Annexure-XLI.

Table 16.1 : Total Number of Road Accidents Classified based on various type of Traffic Control

	Accident	Killed	Injured
Traffic Light Signal	27,173	5,010	24,300
Police Controlled	14,849	3,285	8,986
Stop Sign	11,496	2,670	8,822
Flashing Signal/Blinker	12,484	4,171	13,943
Uncontrolled	2,13,324	58,381	2,06,667

Chart 16.1 : Accidents classified according to various types of traffic control (2014)

Section XVII: Classification based on Persons Driving the Vehicle and Type of Licence

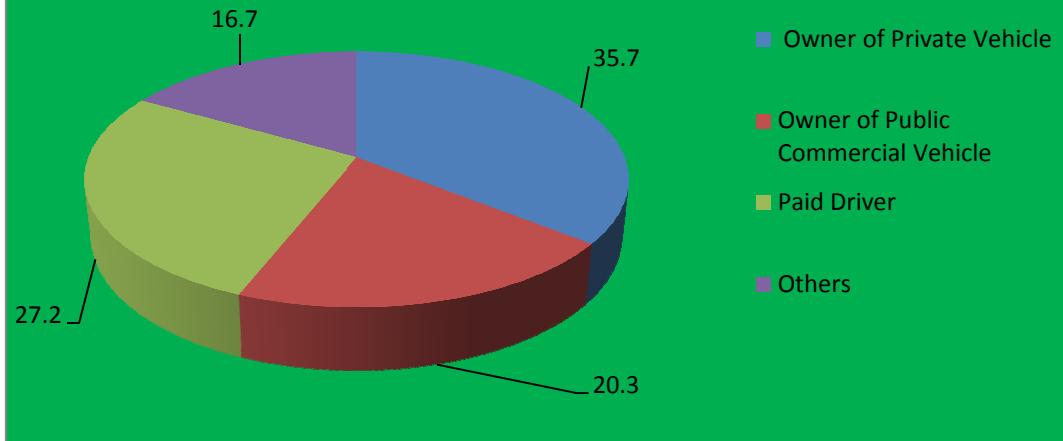

The owner of private vehicles were involved in 1, 71,490 accidents followed by owner of public commercial vehicle (97,433), paid driver (1,30,770) and others (80,410). The details regarding total accidents, persons killed and injured based on persons driving the vehicle are given in table 17.1. Chart 17.1 depicts the percentage distribution of accidents based on persons driving the vehicle. The States/UTs wise distribution is given at Annexure-XLII.

Table 17.1 : Total Number of Road Accidents Classified based on Persons Driving the Vehicle

	Accident	Killed**
Owner of Private Vehicle	1,71,490	17,694
Owner of Public Commercial Vehicle	97,433	12,659
Paid Driver	1,30,770	15,510
Others	80,410	10,545

* Total no. of accidents and persons killed may not tally due to not reporting from Nagaland, Chandigarh and Delhi
** Information pertains to Drivers only

Chart 17.1 : Accidents classified based on Owner of Driving the Vehicles

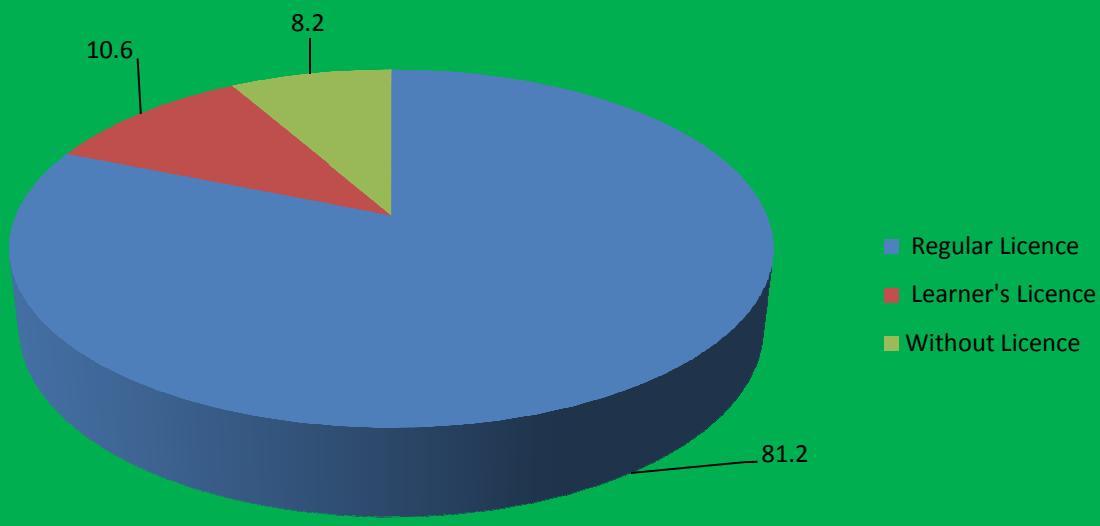

Similarly, the owner of regular licence were involved in more number of accidents (3,89,974) followed by holder of learners licence (50,815) and persons without licence (39,314) based on type of licences. This is depicted in table 17.2 and Chart 17.2. The States/UTs wise distribution is given at Annexure-XLII.

Table 17.2 : Total Number of Road Accidents Classified based on Type of Licence

Type of Licence	Accident	Killed
Regular Licence	3,89,974	40,488
Learner's Licence	50,815	8,347
Without Licence	39,314	7,573

* Total no. of accidents and persons killed may not tally due to not reporting from Nagaland, Chandigarh and Delhi
** Information pertains to Drivers only

Chart 17.2: Accidents classified based on Type of Licence

Section XVIII: International Comparison

According to World Road Statistics 2014 published by International Road Federation, Geneva there is lower incidence of deaths per 100,000 in Australia, Canada, France, Japan, New Zealand, Poland, etc. while comparing it with India. However, road accident related deaths remained at 11 per 100,000 populations in case of Republic of Korea, United States of America and that of India. Incidence of road accident related deaths were higher in Russian Federation (20) and that of Mauritius (12) in comparison to India (Chart 18.1).

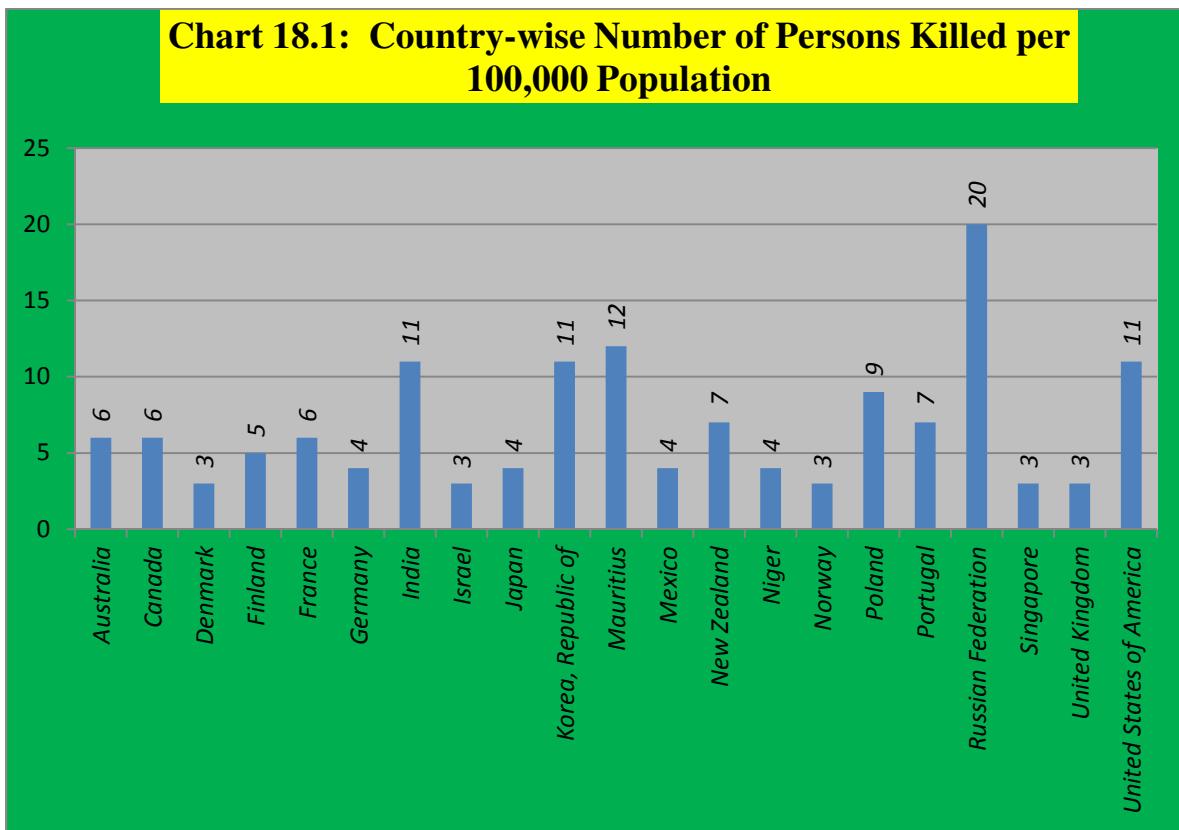

Table 18.1: Cross Country Comparison of Incidence of Road related Deaths and Injury Accidents in 2012

Sl. No.	Country	Killed per 100,000 Population	Injury Accidents per 100,000 Population
1	Australia	6	5
2	Canada	6	352
3	Denmark	3	56
4	Finland	5	106
5	France	6	92
6	Germany	4	373
7	India	11	40
8	Israel	3	158
9	Japan	4	521
10	Korea, Republic of	11	447
11	Mauritius	12	201
12	Mexico	4	11
13	New Zealand	7	217
14	Niger	4	48
15	Norway	3	123
16	Poland	9	96
17	Portugal	7	284
18	Russian Federation	20	142
19	Singapore	3	135
20	United Kingdom	3	229
21	United States of America	11	530

Note: Injury accident refers to road accident resulting in at least one injury or death.

Sources: 1. For India – Transport Research Wing, Ministry of Road Transport &

Highways.

2. For Other Countries – World Road Statistics , 2014.

Injury accidents per lakh of population in India was substantially lower at around (40) during 2012 when compared with other developed countries. United States of America reported the highest figure in respect of injury accidents per lakh population at (530) followed by Japan (521), Republic of Korea (447), Germany (373) and Canada (352). Australia reported the lowest figure in respect of injury accidents per lakh population at (5). A cross country comparison of incidence of road accident related deaths and injury accidents of select countries are given in Table 18.1 .

Section XIX: Road Safety Initiatives by the Government of India

19.1 National Road Safety Policy

The Union Cabinet, in its meeting held on 15.03.2010, approved National Road Safety Policy. The National Road Safety Policy outlines the policy initiatives to be framed / taken by the Government at all levels to improve the road safety activities in the country which are as under:-

Preamble

The Government of India is deeply concerned about the growth in the number of road accidents, Injuries and fatalities in recent years. It recognizes that road accidents have now become a major Public Health issue and the victims are mainly the poor and vulnerable road users.

The Government of India further recognizes that as road accidents involve roads, motor vehicles and also the human beings, road safety needs to be addressed on holistic basis. It also recognizes that regardless of jurisdictions, the Central and State Governments have a joint responsibility in reducing the incidence of road accidents, injuries and fatalities.

In the light of this, the Government of India, through National Road Safety Policy, states its commitment to bring about a significant reduction in mortality and morbidity resulting from road accidents.

19.2 Policy Statement

In order to achieve a significant improvement in road safety, the Government of India is committed to:

(i) Raise Awareness about Road Safety Issues

The Government would increase its efforts to promote awareness about the various aspects of road safety, the social and economic implications of road accidents and what needs to be done to curb the rising menace of road accidents. This would enable and empower the different stakeholders to play a meaningful role in promoting road safety.

(ii) Establish a Road Safety Information Database

The Government will provide assistance to local bodies, Union Territories and States to improve upon the quality of crash investigation and of data collection, transmission and analysis. A National Road Safety Information System will be established for providing continuity and policy Guidelines to this activity.

(iii) Ensure Safer Road Infrastructure

The Government will take measures to review standards pertaining to safety in the design of rural and urban roads and bring them in consonance with international best practices keeping in view Indian traffic conditions. Continuing application of Intelligent Transport Systems (ITS) under a national framework to establish a safe and efficient transport system will be encouraged.

(iv) Safer Vehicles

The Government will take steps to ensure that safety features are built in at the stage of design, manufacture, usage, operation and maintenance of both motorized and non-motorized vehicles in line with international standards and practices in order to minimize adverse safety and environmental effects of vehicle operation on road users (including pedestrians and bicyclists) and infrastructure.

(v) Safer Drivers

The Government will strengthen the system of driver licensing and training to improve the competence and capability of drivers.

(vi) Safety of Vulnerable Road Users

The design and construction of all road facilities (rural and urban) will take into account the needs of non-motorized transport and the vulnerable and physically challenged in an appropriate manner. The Government will seek to disseminate 'best practices' in this regard to town planners, architects, and highway and traffic engineers.

(vii) Road Traffic Safety Education and Training

Road safety knowledge and awareness will be created amongst the population through education, training and publicity campaigns. Road safety education will also focus on school children and college going students while road safety publicity campaigns will be used to propagate good road safety practices among the community. The Government will encourage all professionals associated with road design, road construction, road network management, traffic management and law enforcement to attain adequate knowledge of road safety issues.

(viii) Enforcement of Safety Laws

The Government will take appropriate measures to assist various state and other governments to strengthen and improve the quality of enforcement in order to ensure effective and uniform implementation of safety laws. The Government will actively encourage the establishment and strengthening of highway Patrolling on National and State Highways in cooperation with State Governments and Union Territories as appropriate.

(ix) Emergency Medical Services for Road Accidents

The Government will strive to ensure that all persons involved in road accidents benefit from speedy and effective trauma care and management. The essential functions of such a service would include the provision of rescue operation and administration of first aid at the site of an accident and the transport of the victim from accident site to nearby hospital. Hospitals alongside the National Highways and State Highways would be adequately equipped to provide for trauma care and rehabilitation.

(x) HRD & Research for Road Safety

The Government will encourage increased activity in programmes of road safety research by identifying priority areas, funding research in those areas adequately and establishing centers of excellence in research and academic institutions. The government will facilitate dissemination of the result of research and identified examples of good practices through publication, training, conferences, workshops and websites.

(xi) Strengthening Enabling Legal, Institutional and Financial Environment for Road Safety

The Government will take appropriate measures to ensure that the required legal, institutional and financial environment for road safety is further strengthened and a mechanism for effective coordination of various stakeholders is put in place. The reforms in these areas would provide for the active and extensive participation of the community at large, of the private sector, academia and NGOs.

19.3 Implementation Strategy

The government has decided to establish a dedicated agency viz. a National Road Safety Board to oversee the issues related to road safety and evolve effective strategies for implementation of the Road Safety Policy. The Government has also decided to establish a National Road Safety Fund to finance road activities through the allocation of a certain percentage of the cess on gasoline and diesel.

(i) National Road Safety Council (NRSC)/State Road Safety Councils and District Committees

NRSC is the apex body for road safety established under Section 215 of Motor Vehicles Act 1988. It is chaired by Minister (RT&H) and Ministers-in-charge of Road Transport of States/UTs, DG Police of all States and representatives from the Ministries/Departments such as Home Affairs, Human Resource Development, Railways, Industry, Petroleum & Natural Gas, Environment& Forests, Health & Family Welfare etc. are official members. There are 25 non-official members.

Under section 215 of Motor Vehicle Act 1988 , a State Govt. by notification in official gazette can constitute a State Road Safety Council comprising a Chairman and such other members as the government considers necessary and on such terms and conditions that govt. determine. Similarly, there is also a provision for District Road Safety Committee for each district.

The Ministry had requested all States/UTs on 18.02.2010 for setting up of State Road Safety Council and District Road Safety Committees, if already not done and to hold their meetings regularly so that the right message to curb the menace of Road Accidents reaches to all concerned and due priority is given to road safety. The States/UTs were reminded on 19th July 2011. In response, Governments of Tamil Nadu, Chhattisgarh, Maharashtra, Meghalaya, Himachal Pradesh, Madhya Pradesh, Mizoram, Tripura, Rajasthan, Karnataka, Kerala, J&K, Haryana, U.P., Puducherry, Andaman & Nicobar and Manipur have constituted their respective State Road Councils and District Committees (DRSC). Secretary (RT&H) vide letter dated has again advised all states to constitute and empower the District Road Safety Committees. In

response, the Govt. of Rajasthan and Delhi have constituted the District Road Safety Committees (DRSC). The DRSC can identify road safety related issues, formulate remedial measures and monitor their implementation. The indicative work of DRSC may be as under:-

- (i) Identification of black spots
- (ii) Deployment of ambulances in the district
- (iii) Development trauma care and blood bank facility in the district
- (iv) Enforcement of traffic regulations
- (v) Campaign to spread awareness
- (vi) Creation of wayside amenities
- (vii) Functioning of the District Transport Office

(ii) Multi-pronged Strategy to Minimize Accidents

The main thrust of accident prevention and control strategy across the world has been on 4 E's, vis. (i) Education, (ii) Enforcement, (iii) Engineering and (iv) Environment and Emergency care of road accident victims. The Government of India has been focusing on all these four approaches in its policies and programmes and is also looking at one more E i.e. Enactment of appropriate legislative measures to strengthen the machinery both at Central, State and District level to look after road safety issues.

As per the deliberations in the 12th meeting of the National Road Safety Council, held on 25th March 2011 the Ministry formed five separate working groups on four E's of Road Safety viz. (i) Education (ii) Enforcement (iii) Engineering (roads as well as vehicles) and (iv) emergency care to deliberate in detail and submit their recommendations on short term and long term measures for immediate implementation so as to curb road accident in the country. NRSC in its 13th meeting held on 29th February 2012, deliberated on the recommendations of all the five working groups. A synthesis report containing all the major recommendations of five Working Groups has been uploaded on the Ministry's website.

(iii) Steps taken by Central Government to improve road safety

Road safety is a multi-sectoral and multi-dimensional issue requiring a multipronged approach at various levels. This Ministry has taken several steps to improve road safety for road users which are as under:

- (i) The Government has approved a National Road Safety Policy. This Policy outlines various policy measures such as promoting awareness, establishing road safety information data base, encouraging safer road infrastructure including application of intelligent transport, enforcement of safety laws etc.
- (ii) The Government has constituted the National Road Safety Council as the apex body to take policy decisions in the matters of road safety.
- (iii) The Ministry has requested all States/UTs for setting up of State Road Safety Council and District Road Safety Committees, and to hold their meetings regularly.
- (iv) The Ministry has formulated a draft action plan for improving road safety based on the multi-pronged strategy to address the issue of road safety based on 4 'E's viz. Education, Engineering (both of roads and vehicles), Enforcement and

Emergency Care. The draft action plan has been circulated to all states/UTs for fixing targets and implementation.

- (v) Road safety has been made an integral part of road design at planning stage.
- (vi) Road Safety Audit of selected stretches of National Highways.
- (vii) Setting up of model driving training institutes in States and refresher training to drivers of Heavy Motor Vehicle in the unorganized sector.
- (viii) Advocacy/Publicity campaign on road safety through the electronic and print media.
- (ix) Tightening of safety standards for vehicles like Seat Belts, Power-steering, anti-lock braking system etc.
- (x) Setting up of model automated Vehicle inspection and certification centre for checking the fitness of in-use vehicles.
- (xi) Providing cranes and ambulances to various State Governments under the National Highway Accident Relief Service Scheme for development on National Highways. National Highways Authority of India also provides ambulances at a distance of 50 Km. on each of its completed stretches of National Highways under its Operation & Maintenance contracts.
- (xii) Identification and rectification of black spots (accident prone spots)
- (xiii) Launch of pilot projects for providing cashless treatment of road accident victims on Gurgaon – Jaipur, Vadodara – Mumbai stretch of National Highways No. 8 and Ranchi – Rargaon - Mahulia stretch of National Highway No. 33.

(iv) Multi pronged strategy to improve road safety: steps envisaged

The 13th meeting of National Road Safety Council (NRSC), held on 29th February 2012, where the State/U'Ts are represented by the Transport Ministers and DG/IG of Police of respective States/U'Ts discussed the following measures to improve road safety:

- Identification of black spots and treatment thereof,
- Setting up of State Road Safety Councils and District Committees,
- Setting up of road safety fund at State level including mechanism of diverting 50% penalties collected towards traffic violations in this fund,
- Action against over-loading, action against drunken driving and removal of liquor shops on NHs,
- Enforcement of use of seat belt by four wheelers and use of ISI helmets by two wheelers,
- Developing emergency medical services by having a 24X7 call centre with a dedicated common telephone number backed by ambulances,
- Road accident crash investigation,
- Conspicuity of non-transport vehicles during night time by fixing reflective tapes,
- Accreditation of IDTRs IDTIs for issuing of permanent driving licenses
- Compulsory training before issuance of permanent driving license for commercial vehicles,
- Accreditation of fitness centres to provide objective fitness certificate by RTOs and Developing their audit mechanism,
- improvement of VAHAN & SARTHI software for computerization of all the RTOs including uploading of legacy data, improvement in the software for recording repeated traffic violations, detection of fraudulent driving licenses etc.

All States were urged to give due priority to road safety and address the above issues in a time bound manner.

(v) National Road Safety and Traffic Management Board

Keeping in view the large number of accidents and deaths reported on the Indian roads, the Committee on Infrastructure directed the Ministry to consider creation of a Directorate of Road Safety and Traffic management. A Bill to create the National Road Safety and Traffic Management Board (NRSTMB) was introduced in Lok Sabha on 4.5.2010 which was referred to Department related Parliamentary Standing Committee for examination. However, this Bill has lapsed consequent upon dissolution of 15th Lok Sabha. Now the Ministry has drafted a new Road Transport & Safety Bill 2014. National Road Safety & Traffic Management Authority (NRSTMA) has been made part of this Bill. The Ministry in process of creation of NRSTMA through an executive order, pending its creation through an act of parliament.

The Authority shall have its own Secretariat. The Central Government will appoint a Member Secretary, who shall be a Government employee of the rank of Additional/ Joint Secretary to the Government of India. The Authority will also have other personnel, as specified by the Central Government, to assist in discharge of its functions. NRSTMA will have the power to do all things that are necessary or convenient to be done for or in connection with, or as incidental to, the achievement of the objects of the National Transport Authority.

(vi) Motor Vehicles Act, 1988

The Ministry is in the process to introduce Road Transport and Safety Bill in Parliament covering entire gamut of road safety. If this Bill becomes the law, it will replace the existing Motor Vehicle Act, 1988.

(vii) Identification of Black Spots and Treatment thereof

A meeting was held on 13th January 2012 taken by Secretary (RT&H) with Principal Secretaries (Transport) / Transport commissioners / IG (Traffic)/ officials of Transport Departments/Traffic Police Departments of 13 states which together account for about 85% of the total road accident fatalities to consider measures for strict enforcement of traffic rules and to identify black spots/accident prone spots and take up the 25 top black spots in their respective States for remedial road engineering and traffic calming measures. The requisite data has been received from the states. The short term remedial measures have been completed for the black spots identified.

The Ministry has also received information on the Black Spots based on 10 or more than 10 road accident fatalities for the years 2011 to 2014 from the State/U.Ts. The details of the information have been sent to concerned agencies for rectification of the identified Black Spots.

(viii) Setting up of road safety fund at state level

The States / UTs have been advised to set up road safety fund at state level in diverting at least 50% of the funds generated from fines on account of violation of traffic rules. This fund can be used by the states for various road safety activities.

(ix) Ongoing Schemes of the Ministry to Improve Road Safety

Refresher Training For Heavy Vehicle Drivers: This Ministry has a scheme titled 'Two days refresher training to heavy motor vehicle drivers in unorganized sector' to inculcate safe driving habits and to acquaint the drivers with the rules on roads. As against 15740 drivers trained during Ninth Five year Plan, 1,92,218 drivers have been trained during Tenth Five Year Plan. 1,28,550 HMV drivers were trained during Eleventh Five Year Plan. During 12th plan (upto 31.03.2015) around 60,000 HMV drives of unorganized sector were imparted refresher training.

Setting Up of Institutes of Driving Training & Research (IDTR): The Ministry has felt the need for developing institutional mechanism to provide training to trainers to impart quality training to the drivers, as nearly 78% of all road accident are caused due to drivers' fault. A scheme for setting up of model driving training institute has been formulated by the Ministry. During 10th and 11th plan, 21 IDTR were sanctioned out of which 16 are functional. The DTI / IDTRs are playing very important role in imparting the training to drivers or refresher training at the time renewal of driving license. Till date, as per available information, around 3,00,000 HMV drivers have been imparted refresher training to inculcate the road safety.

Before implementing the scheme of setting up of IDTR during 12th Five Year plan, the ministry has appraised the scheme. The ministry proposes to set up 10 IDTR and 25 Regional Training Driving Centre (RTDC) during 12th Five Year Plan. During 12th Five Year Plan, preference will be given to those projects which are proposed to be executed on Public Private Partnerships (PPP) Model and to proposal from states where no IDTR/DTI was sanctioned during 10th & 11th Plan. Cases for upgradation of driving tracks by way of automation and for provision of driving simulators, if not provided earlier, will also be considered. However, this will be subject to the satisfactory capacity utilization of the institute. In the case of RTDCs, proposals for setting up of driving training centres at existing it is will also be considered. Preference will be given for proposals for all women driving training centres. While evaluating the proposals, the capacity utilization of training centres sanctioned earlier in the State will also be considered.

National Highway Accident Relief Service Scheme (NHARSS): National Highway Accident Relief Service Scheme (NHARSS) entails providing cranes and ambulances to States/ UTs/NGOs for relief and rescue measures in the aftermath of accidents by way of evacuating road accident victims to nearest medical aid centre and for clearing the accident site. So far, 364 ten ton cranes and 126 small/medium size cranes have been provided under the scheme. 579 ambulances have been provided to States/UTs/NGOs under the scheme. During 2012-13, Ministry of Road Transport & Highways has provided 134 advanced life support ambulances to 134 identified State Government hospitals upgraded under the Ministry of Health Highways and Family Welfare's Scheme establishment of an integrated network of Trauma Centers' along the Golden Quadrilateral, North-South and East-West Corridors of the National Highways.

Road Safety Equipment: The Ministry has a scheme under which road safety equipment are provided to States/ UTs for enforcement and implementation of various rules& regulations relating to road safety. Under this scheme so far, 24 Interceptors have been sanctioned for the purpose of detection of violation of rules by the road users such as over-speeding, drunken driving, lane -jumping, dangerous driving etc.

Publicity Measures and Awareness Campaign on Road Safety: With a view to spread road safety awareness among the general public, the Government has been undertaking various

publicity measures in the form of telecast/broadcast of T.V. spots/Radio jingles, organizing Road Safety Week, seminars, exhibitions, all India essay competition on road safety, printing of calendars, Children activity books, book on signage and sign, posters, etc., containing road safety messages for various segments of road users viz. Pedestrians, cyclists, school children, heavy vehicle drivers, etc. A massive public awareness campaign was carried out in the electronic/print media through the Directorate of Advertising and Visual Publicity (DAVP), Doordarshan and All India Radio.

Setting up Model Inspection and Certification Centers for Vehicles: The fitness tests of motor vehicles, being carried out presently are visual and Subjective evaluation by the inspecting officer. In order to have an effective system for inspection and certification of motor vehicles from safety and emission angles, the Ministry intends to put in place a suitably designed automated system throughout the country for rigorous and objective inspection of motor vehicles and to remove the defects before they are allowed to ply on road. During 11th Plan, the Government sanctioned 10 I & C Centre to be set up one each in the States of Andhra Pradesh, Karnataka, Gujarat, Maharashtra, Rajasthan, Himachal Pradesh, Madhya Pradesh, U.P. and Delhi. During 12th Five Year Plan, the Government has decided to set up 10 more I&C Centre one each in the states where I&C Centre was not be Sanctioned during 11th Five Year Plan.

(x) Road Safety Activities

Some of the key initiatives taken during 2014-15 are listed as under:

- 15th Meeting of the National Road Safety Council (NRSC) was held on 28th October, 2014 in NASC Complex, Indian Council of Agricultural Research (ICAR), New Delhi. The basic objective of this meeting was to see whether it meets the aspiration of all states and stakeholders and also to discuss improvements that can be made in the draft Road Transport & Safety Bill, 2014. The proposed Bill not only deals with Road Safety related issues but it also envisages the modernization of road transport infrastructure in India. It aims to improve the quality of vehicles on the roads, especially with regard to safety and emissions. The draft bill also seeks to provide setting up of Independent Lead Agency, for vehicle regulation and road safety, which shall regulate motor vehicle safety and design standards, driver licensing, registration of motor vehicles, road safety and traffic management standards.
- A Media campaign was launched by the Ministry through the entire Doordarshan network including the Regional Centres and Regional channels, All India Radio, VividhBharati and all Regional stations, 35 Private TV channels, Private FM radio stations throughout the country and in leading newspapers throughout the country with special emphasis on the Road Safety.
- The 25th National Road Safety Week, with the theme "Safety is not just a slogan, it's a way of life" was observed during 11-17 January 2015 throughout the country involving State Governments, voluntary organizations, vehicle manufacturers, State Road Transport Corporations etc. A function to celebrate 25th National Road Safety Week was organised on 16th January, 2014 in India International Centre. A new road safety logo was launched by the Ministry.
- Road Safety material was distributed comprising of Book on Road Signage & Sign; posters in Hindi, English and Regional languages across the country in order to raise awareness on road safety.
- A symbolic Road Safety Walk was held on Sunday the 11th January, 2015 at 10:00 A.M. The motive of the walkathon was to engage and make more people aware of road safety and its associated aspects. States were requested to organize a Road Safety Walk.

(xi) Pilot Project for Cashless Treatment of Road Accident Victims

In order to give a boost to emergency care of the accident victims, a pilot project has been launched by the Ministry of Road Transport & Highways for three stretches viz. Gurgaon - Jaipur section of NH-8, Vadodara - Mumbai section of NH – 8 and Ranchi –Mahulia section of NH-33 under which free cashless treatment upto an limit of Rs. 30,000/- will be provided to the road accident victims for the first 48 hours. Ministry has asked World Health Organization (WHO) for appraisal of cashless scheme. WHO has agreed to conduct the appraisal. Based on the experience gained during pilot phase of cashless treatment and appraisal to be done by WHO, the cashless treatment scheme may be extended to other parts of the country.

(xii) Safety of Cyclists

Ministry of Road Transport & Highways had taken up the issue of improving the visibility of bicycles with the Department of Consumer Affairs and the Bureau of Indian standards (BIS). Use of retro reflective tapes had been suggested to improve the visibility of bicycles at night. The Department of Consumer Affairs and the BIS are in the process of amending IS: 10613 to include the provision of retro-reflective tapes on bicycles to improve their visibility. They are also in the process of issuing a quality control order for mandating the safety requirements for bicycles manufactured in India.

(xiii) Procedure for Accreditation of Bus Body Builders

Ministry has issued S.O.2356 (E) dated 03.10.2012 mandating the procedure for accreditation of bus body builders. Bus body code has been notified vide G.S.R 287(E) dated 22nd April, 2014 and SO 1140(E) dated 30th April, 2015 to be implemented by 1st August, 2015.

(xiv) Mandatory Fitment of Speed Governors in Specified Categories of Transport Vehicles

Ministry has issued a GSR 290(E) dated 15.04.2015 regarding mandatory fitment of Speed Governors in specified categories of Transport Vehicles with effect from 1st October, 2015.

(xv) Other Measures Taken To Control Accidents

A committee was set up by MoRT&H under CEO, NATRIP & Joint Secretary, Deptt. of Heavy Industry to recommend measures for safety of occupants of 3-wheeler auto rickshaws. The Committee has submitted its report, which was accepted by the Ministry. Recommendations of the Committee have been communicated to all concerned for implementation.

(xvi) Digitization of Legacy Data of Driving Licenses and Registration Certificates (RCs)

Ministry of R T &H has been facilitating computerization of District Transport Offices (DTOs)/Regional Transport officers (RTOs) all over the country. NIC was entrusted the task to standardize and deploy software 'VAHAN' for vehicle registration and 'SARATHI' for driving licenses and compilation of data with respect to vehicle registration and driving licenses in the State Registers of the respective States from where it flows into the National Register. VAHAN and SARATHI have been successfully customized and implemented in 33 States/UTs. Out of 1006 RTOs, 1002 RTOs have been computerized. The development of new centralized, web enabled architecture with single database and application for whole country is completed for all 33 States/UTs and is set to

be rolled out in pilot site of each State/UT. 100% connectivity has been achieved in 32 States/UTs and 1000 RTOs are connected in 35 States/UTs. Vehicles on the VAHAN register crossed the 100 million mark on the 5th November, 2012. State Transport Department officials as well as enforcement authorities have been provided access to the data on the National Register to facilitate instant verification of all DLs/RCs which have been digitized by sending SMS from their registered mobile number. Details of the RCs and DLs Records available in the National Register repository are as under:

Number of Vehicle Registration (RC) details in the National Register: 17.07 Crore
Number of Driving License (DL) Details in the National Register: 7 Crore

Enforcement agencies and transport departments have been provided the facility of obtaining details of RCs/DLs from the national register by sending an SMS to NIC from their registered official mobile phones.

Rule 93 (8) of the CMVR, 1983 provides that no motor vehicle shall be loaded in any manner that the load on part of it extends laterally or vertically beyond its body. The proviso of allowing protruding rods of one meter distance beyond the near most point of the motor vehicle has been removed vide G.S.R. 152(A) dated 05.03.2014.

(xvii) Anti-locking Brake System (ABS): Rule 96(9) of CMVRs requires the following category of vehicles to be fitted with ABS:-

- N2 and N3 category of vehicles other than tractor-trailer combination manufactured on and after the 1st day of October, 2006 meant for carrying hazardous goods and liquid petroleum gas;
- N3 category vehicles manufactured on and after the 1st day of October, 2007, which are Double decked transport vehicles;
- N3 category vehicles manufactured on and after the 1st day of October, 2007, that are Used as tractor-trailer combinations;
- M3categoryof buses that ply on All India Tourist permit, manufactured on and after the 1stday of October,2007

In order to bring in more categories of vehicles under the mandatory fitment of ABS, rule 96(9) of the CMVR have been amended vide G.S.R 389 (E) dated 9th June, 2014 mandating all M3 and N3 categories of vehicle for fitment of ABS. It will be implemented from 1st April, 2015 for new models and 1st October, 2015 for existing models.

(xviii) Child Restraint: In Rule 125 of CMVR, it has been inserted that Motor vehicles of category M (I) excluding transport vehicles and special purpose vehicles manufactured or on after 01.04.2015 shall have a provision of installation of at least one category of child restraint system specified in ISO 72-2009.

(xix) Fitment of Radio Frequency Identification (RFID)Tag : This Ministry vide Notification G.S.R. 207 (E) dated 8th April, 2013 mandated fitment of Radio Frequency Identification Tags in the M and N category of vehicles for the Purpose of Electronic Toll Collection(ETC)and other applications.

(xx) Quadricycle: In order to provide more comfort and safety to the public travelling by 3-wheelers, a new Category "Quadricycle" was introduced in Central Motor Vehicles Rules, 1989 vide Notification G.S.R. 99 (E) date 19th February, 2014 amending the Central Motor Vehicles Rules, 1989.

Road Accidents, Persons Killed and Injured: 1970-2014

Year	Total Number of Road Accidents (in numbers)	Total Number of Persons Killed (in numbers)	Total Number of Persons Injured (in numbers)	Population of India (in thousands)	Total Number of Registered Motor Vehicles (in thousands)	Road Length (in kms)	Number of Accidents per Lakh Population	Number of Accidents per Ten Thousand Vehicles	Number of Persons Killed per Ten Thousand Kms of Roads	Number of Persons Killed Per Lakh Population	Number of Persons Killed per Ten Thousand Vehicles	Number of Persons Injured per Lakh Population	Number of Persons Injured per Ten Thousand Vehicles	Number of Persons Injured Per Ten Thousand Kms of Roads
